lokisfather's/lotusfather's Gran Turismo 2 Hybrid and Prize Car Buying Guide.

You NEED at least a Version 2.2 Gameshark (a 3.1 recommended to avoid too many lock ups) for ANY AND ALL of these codes. If you don't have one you CANNOT use these codes. So get one on ebay or a used game shop or you are S.O.L.

In 2000 I frequented the [www.granturismo.com](http://www.granturismo.com) forums under the moniker of Memnoch The Speed Devil, I made a list of all the prize cars with gameshark codes so you could buy them in the Toyota New Car lot, with input from other forum members, I can remember GT2toXS and Sportwagon, but there may be others so if you did help way back when and I don't credit you I'm not trying to steal or anything I just can't remember, so email me and I will give you credit.

The forums I did this on are long gone and with it my list, but I found them again so I am making this FAQ with all the Prize Car codes and Hidden Car codes so you can buy them in the Toyota New Car Lot. Knowing now how much more reliable sites like [www.gamefaqs.com](http://www.gamefaqs.com) and [www.supercheats.com](http://www.supercheats.com) are here is the code list.

*2.0 Body Codes*
=====

```

These are the body codes for the first car in your garage. If you input one of these codes it will replace the body of the car in garage slot 1 with the body code you input. (The main use I have for these codes is cars with ugly [R] bodies like the Speed 6. I mod them then put in the code and keep the benefits of the racing mod and the looks I like.)

```

=====
*3.1:  Base Codes*
=====

```

These codes are for the first garage slot on the Sim Disc. They will replace the parts on the car that is there. Note that pushing start on any car in your garage will put it in slot 1 and if the code is active it will replace the parts in that car also. While this can be usefull to get a certain part in several cars in one shot it can also be a pain if you accidentally push start on a car you don't want to make a hybrid. If you do this, don't save. Reset and start over. Also, a word of advice. Use a separate memory card for building hybrids, save and buy them with a second card. As with any Gameshark codes you run the risk of corrupting your save and losing everything, not likely (it has never happened to me in almost 6 years), but better safe than sorry.

\* The Tune Code lets you choose which dealer you get your parts from, it is necessary to tune some of the hidden cars like Vauxhaul. Note that you MIGHT have to invert the codes. For example Alfa Romeo would end up 0001 and Audi would be 0403. I always use the Acura code (0000) so I don't have to worry about it.

Here are the codes:

ACURA: 0000

ALFA ROMEO: 0100

ASTON MARTIN: 0200

AUDI: 0304
