Select them in the strategy screen, choose "professional" (the most efficient, and you got more control of the strategies)

To set the strategies hold L2 and push S and/or O and/or T and/or X.

A little description of the strategies :

Right or left side attack

Set this strategy to attack by the sides right or left,
this make y our attack more efficient on the side(s) witch you choose

Offside trap

Come on, you Know this rule (I think this)
Make you team "play" with the offside trap, the defender trap you oponent
in offside.
This strategy is dangerous, and the most of the times, very useless.

Area press

The best strategy in the saga International Super Star Soccer
(from the game ISS of Super Nintendo (SNES))
They make press over the opponent team.
This strategy is the most useful of the game, and with this your defending to be more easy.

Counter attack

Use this if you play style is the long ball (in sudamerica we called this style "al pelotazo")

Centre attack

Set this strategy to attack by the center of the field.
(This strategy is good for centering)

Change Sides

This strategy changes your players of his sides to the other side.
Example: A player was ubicated in the right side, now he be play on the left side.
This is good to confuse your enemy
But... be careful don't confuse you too.

Opp. Side Attack

The players go for the other side in attack, and if you change the side you be a good chance to
make the attack best.

Centre Back Overlap

This strategy makes you center back, go foward and go to the enemy area (it's good to suprise
the enemy) (and it's very cool)
