6.1 What's Missing/Needed

6.2 Credits

1.1 Basic Game Legend

f - Forward S - Strong Attack + - And ub u uf P - Punch \ | / / - Or b - Back , - Then b-- --f u - Up K - Kick / | \ d - Down T - Taunt Button x - Times db d df

qcf - quarter circle forward (d, df, f)

qcb - quarter circle back (d, db, b)

hcf - half circle forward (b, db, d, df, f)

hcb - half circle back (f, df, d, db, b)

1.2 Chain Attack Legend

- * can perform special/super right after if connected
- E ends string
- 1 first hit must connect for this part to come out
- 2 second hit must connect for this part to come out
- 3 third hit must connect for this part to come out
- O overhead
- must be blocked low
- A launches opponent into the air
- G opponent must be on ground and must be close enough to connect the pursue (otherwise dash towards them before they recover to get close enough)
- < backdash
- > shifts to other side of opponent
- H first attack must be from a high jump for this part to come out

2. System

+++++++++++++ | 2.1 Basics | ++++++++++++

Throw f/b + S close

f, f Dash Forward can attack out of dash uf Dash Jump

Halt b Dash Backward b, b invulnerable for a second

Air Turn Around T in air works only on high jumps

Short aka Small Jump tap ub/u/uf High Jump press ub/u/uf Air Block ub/u/uf, b Block High Block Low db

will not block overheads

Recovery Roll

b, db, d + T after being knocked

down

Dizzy Recovery

shake joystick and tap the buttons rapidly when dizzied

Defensive Attack

f + LP while blocking

you will find this will work if you perform it while blocking a whiffed attack or perform directly after an attack hits your block animation; on heavy attacks (HP/HK/supers/etc), wait a little longer to perform after the move hits your block animation

Quick Approach

f + T when the opponent is attacking

you must time the motion to the opponent's attack; you will absorb the attack while moving forward and not take any damage; this functions essentially like a parry and as such you can perform specials/supers at the end of the Quick Approach or even perform another Quick Approach

Reversal

guard, and then perform a special move after

blockstun

Break Shot

perform move marked requires H. Power or higher

with (BS) while

blocking

Kara Cancel

input a special or super during the early frames of a normal/command

attack

Secret Moves - These moves are listed as such in the movelist details. Some characters have secret moves and they are not usable until they are unlocked. To unlock them you must beat the game with every character in Arcade Mode by not losing a round and meeting Geese each time. Once you do this with every character the secret moves will unlock.

| 2.2 Power Gauge And Supers |

- Power Gauge This fills when you use special moves, connect (not blocked) any attack, or when you block an opponent's attack.
- H. Power This occurs when half your power gauge is filled. This allows you to use Break Shots and Recovery Rolls.
- S. Power Super When your gauge is filled, you will have a S Power bar.

 It decreases over time, until eventually your gauge empties completely. You are able to use a S. Power Super when the S. Power bar is active. After using a S. Power Super, the bar will automatically empty. You can also perform S. Power Supers when your lifebar is flashing. During this time, there is no need for a charged Power Gauge and you can perform as many S. Power Supers as you want.
- P. Power Super When the gauge is filled and your lifebar is flashing red,
 the power gauge will display a P. Power bar. As with the S.
 Power bar, this decreases over time. During the bars active
 run, you can perform a P. Power Super. Once performed, the
 power gauge will empty.
- Final Impact Final Impacts in this game are essentially super cancels. Each character has the ability to cancel certain specials or supers into other supers. In each character's movelist there is the chain of possible canceling options. Final Impacts can be performed in two ways. One is by performing the initial move and immediately entering the motion of the finishing super. This requires very fast timing. The other method is by hiding the motion of the second maneuver into the motion of your initial maneuver of the chain. For example, Terry can cancel his Power Wave into his Triple Geyser. A simple way to do this is use the motion qcf, qcf + P (which will activate the Power Wave), then press S (which will activate the Triple Geyser).

Colors

K - Blonde hair and White costume w/ Red trim

S - Blue hair and Pink costume w/ Green trim

*****Notes****

- -White cannot jump, crouch, dash, or block
- -Since White cannot block he has no break shots
- -Nearly all of White's attacks have some sort of invulnerability (not f + P, however). For example, performing a simple Straight Staff attack at the right moment can allow projectiles to pass through him.
