Secrets and General Information FAQ
for Devil Summoner : Soul Hackers
for the Sony Playstation and Sega Saturn
by Zhou Tai An (kain@pacific.net.sg)

Version 1.0

If you're using this for anything besides non-profit, mail me or I will be Seriously Upset.

Secondly, this FAQ is basically nothing more than a few hints of my own and massive amounts of information gleaned from various Japanese homepages dedicated to this game. Heartfelt thanks goes to the people from which I've gotten this info. ^_^

And yes, there's a lot of JIS\EUC encoding here. Either go to <http://www.njstar.com> for a good viewer or convert this to HTML and run it through Shoudouka. (<http://www.shoudouka.com>)

1. How to gain Loyalty :

There are five basic types of personalites (which can be changed with items) Friendly, Cunning, Dumb, Cold, and Fierce. Increase a Friendly monster's Loyalty by using healing magic and defending, Fierce ones by attacking normally, (no magic) and Cunning by using magic.

For Dumb and Cold...not much info. I've found that using a combination of normal attacks and magic seems to work, though.

Once a monster has reached about 5 in it's Loyalty, you shouldn't have much trouble with it disobeying commands.

2. The Sea Ark building.

Found in the Tenkai Bay, this building will become integral to gameplay later on. What it basically is is a repository for all the normal monsters in the game, which become progressively more powerful as you get to higher floors, determined by your level. Low level means lower floors and correspondingly, worse monsters. The elevator on floor two will get you up without too much trouble. There are stairs on each even-numbered floor as well, but none on odd ones, so the only way to get higher is the 'vator. A Terminal and Heal Spot in the Lobby makes things a bit easier.

I'm sure you can see the possibilities. This place makes a lot of monster combinations easier, helps you get that last one you missed way back 2 dungeons ago etc...combined with the Copernicus Trick, (see number 8 right at the bottom of the FAQ) that Demon King seems much closer that it was before.

The list of monsters which appear on each floor : (up till seven at least)

3. Certain monsters can be transformed into items when their Loyalty is 5 or higher - the list is here.

Because I'm too lazy to go down through the list and change each entry (^_^) I've summarized the most important item effects here. The other effects aren't too important.

4. Now, about Eä°. These creatures will increase a given monster's stats when combined with it - it will stay the same monster, though. The list of what increases what and how to combine each individual one is here :

- Eä° fJfMf~f^ = Speed and Intelligence
- Eä° fNfVf~f^f} = Magic, HP and MP
- Eä° fTfLf~f^ = Luck and HP
- Eä° fAf%f~f^f} = Attack and Stamina.

This is the combination list.

7. There are also secret monsters combinations. Most of this is info obtainable from the Pet Shop in trades.

During the New Moon, combine the following types of monsters to get Wild Gods.

u-, l v u _ v u "é _ v u ^ Ð - i

Light and Dark versions of the below for Secret Gods.

u _ v u "j%ó _ v u 'n .ê _ v u -, % v u ž x _ v u ž €

These get you War Spirits, also during the New Moon.

u-, l v u _ v u "j%ó _ v u 'n .ê _ v u -, % v u ž x _ v u ž €

Full Moon for these, though, to get Special Beasts.

u _ b v u ^ 1 b v u -, b v u ' ; b v u - d b

8. The Copernicus Trick.

Listen up, ladies and gentlemen, because this is dammably useful. ^ _ ^

First, get the Copernicus Module from the Pet Shop. It's from the person who wants specific monsters (the Goddess Fortuna, in this instance) - last choice. Then, add the Arubato Module to your COMP and save.

These two working together will ensure a 99% Accident rate with monster combinations - believe me, this is a good thing. Go out and start combining (it works better when you have a large monster base to begin with) You'll get a lot of duds (sucky monsters) but if you get lucky, Great Angels, Demon Gods, Death Gods and all sorts of cool stuff becomes a distinct possibility. The summoning limit of the monster levels is yours plus five, so a high level helps.

This will allow you to make a VERY powerful party, especially since the above types of monsters usually are mighty hard to obtain normally due to their extreme power. Best thing is, you usually will get one after only 7-10 combinations - not too long a wait IMHO.

9. And finally, to round things off, a complete Monster List :
