III.AUTHOR NOTE

Listen up, follow my orders and do as i say and we can defeat those Chefs. Dont believe in me and you will be the loser. If you want to win the Cooking Contest, dont question me again. If you can't do that, i will consider you as an obstacle that need to be removed.

=====
IV.RULES

This cooking game is a new improvement by Konami for the second episode of Suikoden. Yeah, this cooking contest reminds me to Stephen Chow's movie called, God of Cookery. First of all, you need some stuffs to make good foods. You need ingredients such as, egg, meat, cabbage, etc. And, you need to buy some Sugar, Salt, Red Pepper, etc from some trading posts. Last, of course you need the recipes. Once you've got some of them, you can earn some money from the restaurant by making menu. The more recipes and ingredients you've got, the more expensive they're.

Also there're some Cooking Contest in the game. The contest offer you to make 3 kind of food for each category. They're Appetizer, Main Dish and Dessert. The score will be given by 4 random judges from your castle members. Each judges have their own favorite kind of foods. Each food will get 4 score from each judges. The score is 1 to 5. That mean, which one having more points, that will be the winner. When the contest begin, there're 2 bar in the top-left corner of screen. The red describe your enemy cooking speed. While the blue is your cooking speed. Press X (Cross)rapidly to boost up your cooking speed.

=====
V.WALKTHROUGH

The cooking starts after you've recruit Hai Yo. To recruit Hai Yo, your castle must reach level 2, and you need to find him in the floor two, balcony. Hai Yo is one of 4 lords of the Black Dragon Group, the most fearest Chefs Group in the world. Hai Yo's real name

is Seiryu, who have the Moon Bird Recipe. Many Chefs was chasing that Moon Bird Recipe. The recipe was passed from chef to chef for ages. Shun Min, a daughter from 1 of 4 lords of Black Dragon Group, Retso. She's die because protecting that Moon Bird Recipe from Jinkai, the Grand Wazoo of the Black Dragon Group. She give the recipe to her closest friend, Seiryu. That is the story began, by the way, once Hai Yo is recruited, many chef has come to challenge him in a cooking contest, including the other lords from Black Dragon Group. The contest begin when you try to enter the kitchen. Here's the list.

Once you've clear all the contest, then it'll be no more contest again. And oh yeah, there're no turning back on the contest, so if you are planning to get all of the recipes, make sure you do save your game before starting a contest with though opponents.

VI. INGREDIENTS

The ingredients, are separated into 4 category. They're Spice, Liverstock, Vegetables and Fish. Some foods need 1 or 2 different ingredients. This is where you can find the ingredients.

1. SPICE

- Sugar : Can be bought from Kobold Village Trading Post, Forest Village Trading Post, and Highway Village Trading Post
- Salt : Can be bought from Forest Village Trading Post, South Window Trading Post, and Rokkaku Trading Post
- Soy Sauce : You can buy it from Gregminster Trading Post, and Rokkaku Trading Post.
- Mayonnaise : You can buy it from South Window, Highway and Kobold Village Trading Post.
- Red Pepper : You can buy it from Rockaxe Trading Post or from Crom Village Trading Post.

Once you've found and buy the spices, you can give them to Hai Yo. But you dont need to buy lots of spices. Just store them in Barbara's vault.

2. LIVERSTOCK

- Calf : -Buy it from a man for 6000 in DrakeMouth Village.
-Buy it from a boy for 7000 in Highway Village.
-Buy it from a boy for 5000 in Highway Village (After retaken Rockaxe from Highland)
- Chick : -catch it around the houses at TigerMouth Village.
-catch it near the beach at LakeWest Vilage.
- Lamb : -A boy in front of Tony's House for 4000 at Forest Village.
-In the forest of Kobold Village. Its at the place where you find the unicorn before fighting Luca Blight, after helping Hix and Tengaar, there is another sheep for you to catch.
-Sajah Village rare find
- Piglet : -A boy in front of Shu's house for 5000 in Radat
-From a person in Rokakku trading post for 6000.
-Catch it around Greenhill School Area.

If you found them all, you can go back to your castle, and go meet with Yuzu. Give Yuzu the liverstocks you've got. She will took care of them. I dunno but according to my bro infos, dont give 2 or 3 liverstock simultaneously to Yuzu, or they'll appear as one liverstock.

3. VEGETABLES

- Cabbage : -In a barrel in Lakewest Village.
-In one of the houses on Drakemouth Village.
- Potato : -From a woman in Banner Village
-Dropped by Papa Holly (enemy from "Forest Path" to Matilda)
- Spinach : -From Susu after Chaco joins (Two River Wingers Area)
Possible only if you meet with Susu in the Two River

Scene (When Chaco ask you to meet his Grandma)

-Forest Village Elder (after Tony joins)

-Dropped by Eye Flower (enemy around Greenhill after liberation) (World Map)

-Tomato : -A rare find in Banner Village's item store

-From a man in Gregminster for 700 P

-From a child in Tigermouth Village

If you found them all, you can go back to your castle, and go meet with Tony. Give Tony the liverstocks you've got. He will took care of them. I dunno but according to my bro infos, dont give 2 or 3 seeds simultaneously to Tony, or they'll appear as one seeds.

4.FISH

-Salmon : You can get it from Fishing Game with Yam Koo in your castle, so you need to recruit Yam Koo first. He and his bro can be recruited from Kuskus dock. After you gain your castle. Btw, Salmon is the hardest to catch

-Shrimp : You can get it from Fishing Game with Yam Koo in your castle. Shrimp is a bit hard to catch. You need to wait about 2 or 3 minutes to make it appear.

-Shelfish : You can get it from Fishing Game with Yam Koo in your castle. Its the standard fish for cooking.

-Whitefish : You can get it from Fishing Game with Yam Koo in your castle. This is easiest fish to get.

EXPLANATIONS ABOUT FISHING :

You can use one of Yam Koo fishing rods, but you have to pay 100 potch each time for bait. you can either use the fish you catch for cooking or if you don't want it, Yam Koo will buy it. The price.... depends on what type of fish you've got and its weight.

Here's the fish type :

1.Salmon : You can use it for cooking. Its also expensive.

2.Shrimp : You can use this for cooking. You will got a good price tough.

3.Shelfish : You can use this for cooking too !

4.Whitefish : You can use this for cooking.

5.BlowFish : Yam Koo will buy it from ya.

6.StoneFish : The most common fish.

7.Squid : The baddest catch. Ya better let it go.

8.Boot : This is not a fish.. its a boot... oh my.

Anyway, here's how to fish. Just cast out with your rod. Once you have cast out your line, just wait for a fish to strike. If you get tired of waiting and want to quit, press triangle button to reel in your line. But you will have to change the bait.

When you have got a fish on the line, press the cross button quickly to increase your pulling power.The green gauge on the right is your Pulling Power. You have to match this with the fish's Pulling Power. As it struggles, it's Pulling Power will change, so be careful to keep them in sync.If the gauge turns red, it means you're pulling too hard and if you keep it up, you will pull the hook right out of its mouth. On the other hand, if it turns blue, you're not pulling hard enough and the fish will soon tear the hook off.

Keep going not too strong, not too weak and the distance gauge at

the top screen will slowly decrease until it reaches 0 and you can catch the fish.
