LEVEL BRIEFINGS FAQ: V 1.0

-----  
Level 1: Hotel Fukushima

=====

Gabe and Lian have come to Tokyo on the trail of Shi Hao, the leader of a chinese army rebelian. It is believed that he is trying to reproduce the Syphon Filter virus to aid his insurgent movement and is enlisting the help of the J.R.A (Japanese Renbilian Army), a japanese terrorist group.

A meeting between Shi Hao and the J.R.A is planned for tonight in the Shinjuku district. Across the street, Gabe must use room 413 of the hotel Fukushima as a snipers nest, his target, Shi Hao and his highest ranking luitennants, if they die, the rebelian dies, and Syphon Filter is prevented from falling into the wrong hands.

Level 2: Costa Rican Plantation

=====

Logans testimony from the congressional record:

"In agust 1999, Lian and I where given a difficult mission, infiltrate Rhomers operation and rendezvous with ellis, our undercover agent and help him complete his mission. The order came from my agency C.O, Edward Benton. At that time I didn't question his orders."

"Lian and I made the drop successfully but got seperated. The plantation was spread out and heavily guarded. I knew we where in trouble when we hit the first traps, automated machine gun nests, it was pretty obvious that Rhomer didn't want visitors.

Level 3: C4 Galaxy Transport

=====

Logans Testimony from the congressional record:

"Lian had discoverd from Elsa Wiessinger, one of Rhomers Lab technitions, that Rhomer was readying in a cargo plane for escape. He had ordered all the plantation workers to be killed and loaded the plane with crates filled with the extract from the plants he was growing"

"I boarded the plane determined to stop him. What I didn't know at the

time was that Rhomer was already working for the agency, that my own C.D had betrayed me to get his hands on Syphon Filter. One of the things the agency supplied Rhomer with was the same advanced armour that I would later find on Jason Chance"

#### Level 4: Pugari Gold Mine

=====

Mujari's testimony from the congressional record:

"In 1984 I was a soldier for the African National Council fighting to liberate my African Brothers from apartheid. On August 24th of that year, Venik Smith, Shawon DeJesus and I infiltrated the Pugari South African mining corp. to sabotage the facilities and free the indentured workers."

"We discovered that many of the workers had been exposed to some unknown biological agent that was unearthed deep within the mines. A foreman named Samuel Jones, sealed the sick men in one of the mines to keep them from infecting the other workers. For me, it became a mission of great loss and deep regret."

#### Level 5: Pugari Complex

=====

Mujari's testimony from the congressional record:

"As I was setting the explosives, I was attacked by guards. The explosives were hit and went off, prematurely. I quickly took cover and survived, but the structure of the mines had been compromised and they began to collapse. I would have perished had not Smith been able to activate the power to the railways. Getting to the mine carts was my only chance."

"They were determined to prevent me from finding the sick workers. I began to wonder why, what had happened to them? why were they quarantined? I was going to find the answer, and nothing was going to stop me. Not even an army of Afrikaners."

#### Level 6: Kabul, Afghanistan

=====

Lian Xing's testimony from the congressional record:

"I was in Kabul gathering evidence of Soviet commander Uri Gregorov's troop movements. The city was heavily patrolled, and snipers were everywhere. I had to be careful because Chinese intel showed the Soviets had developed a weapon that could penetrate solid objects. I knew my mission would be easy if I got my hands on that gun."

"Somehow I managed to walk into a Soviet ambush, I would have been killed but an American Army Ranger saved me. He said his name was Gabe Logan. I agreed to help him get his truckload of arms for the rebels into the city by creating a diversion."

#### Level 7: S.S Lorelli

=====

While Lian is testifying in Washington, Gabe is in Ireland tracking down another shipment of the Syphon Filter virus. Working with his M16 counterpart Maggie Powers, Gabe must ensure that the shipload of viral containers never reaches its destination.

To do this, Gabe must infiltrate the ship and plant explosives in key

locations. The bombs are timed to go off while the ship is at sea, thus sending it to the bottom of the atlantic. Gabe knows he must also find the ships manifest so he can find out where the virus is being tested. He needs any evidence he can find that will help him discover who is behind the shadowy organisation controlling the agency.

#### Level 8: Aztec Ruins

=====

Lian Xing's testimony from the congressional record:

"Rhomers group had kidnapped an impressive list of world renowned scientists and medical technicians to work in his labs. Benton was very concerned that I get them out alive. The agency needed their knowledge to help decipher whatever the plants were being used for"

"I was also ordered to collect samples of the plant materials they were synthesizing. Somewhere they were using computers to model the plants chemistry. I had to collect the data disks and destroy the computers. At the time, we had not heard of the term 'Syhpon Filter'"

#### Level 9: Waterfront

=====

While Lian continues her testimony in Washington concerning their first Syphon Filter mission together, Gabe is busy with problems of his own in Ireland. While he planted the explosives on S.S Lorelli, and obtained the shipping manifest, Maggie Powers' MI6 team were attacked by the ARM.

Somehow the ARM had discovered the constortium's plans to drop viral containers at this dockyard, and have already unloaded several truckloads of the virus. Gabe knows he can't let any of the trucks to escape. If the ARM gets it's hands on Syphon Filter, Europe will never be the same.

#### Level 10: Docks, Final Assault

=====

Gabe has found and contained four of the ARM trucks which were loaded with the stolen viral containers, but two more remain and he has no idea where to find them. Gabe had Maggie to order her team to spread out quickly across the dockyards in a search and destroy pattern.

A emergency radio call comes in from Maggie's best field agent, Nigel Cummings, is being pinned down by sniper fire in the north dockyards, Gabe has to get there as quickly as he can. That area of the wharf is a labyrinth of shipping containers: the perfect place to hide a truck. Gabe knows he doesn't have muchtime.

#### Level 11: Convoy

=====

Logan's testimony from the congressional record:

"After our team was wiped out, I was ordered to scout ahead and clear the road of hostiles, while Ellis stayed near the truck. Someone, either the Afghan rebels or the Soviets, had mined the roads and only Ellis had the expertise to diffuse them."

"I had reconned the general area some moths ago before, so I knew the desert was riddled with rebel trenches and tunnels and the road passed directly in front of ancient fortress ruins which they had been using for a headquarters. I only hoped that they had not blown the bridge one click north."

## Level 12: The Beast

=====

Logan's testimony from the congressional record:

"Lians diversion worked perfectly. I don't know what she did, but suddenly an entire garrison of troops who had been defending the southern city walls, simply vanished and I was able to escort the truck into Kabul."

"When we got close to the rendezvous point, however, we ran into even more trouble. A soviet T-64 was guarding the town square, and he had help: Soviet troops were poring in. I had no idea how a single infantryman was going to take out several tons of russian armour."

## Level 13: Australian Outback

=====

The recovered shipping manifest from S.S Lorelli told gabe and Lian where the virus was being tested and shipped from. Because DR. Weissinger's signature was on the shipping invoices, they also knew who was running the medical end of the operation. They would need to capture her to solve the mystery of who was behind Syphon Filter.

Since gabe was required to be in Washington to testify, Lian teamed up with Maggie Powers to perform the kidnapping. But Lian also had some other plans. She intends to obtain photographic evidence of genocide, sabotage the compounds communications, and take out as many terrorists as she can. She vows that when she is finished, no one will ever be infected with this virus again.

## Level 14: St George, Australia

=====

After capturing DR. Elsa Weissenger, Lian discovers that the consortium has been testing different strains of the virus on the local population of aborigines. Lian forces Weissenger to synthesize the vaccine so that Lian can help as many of the nearby villagers as she can.

But commander Silver is on an accelerated timetable. Under orders from Mara Aramov, he is to shut down the entire operation, killing not only the aborigines, but the medical staff. Lian knows that she can't let herself be seen by the compound guards until she eliminates Silvers, or many innocents will die.

## Level 15: Paradise Ridge

=====

Teresa's testimony from the congressional record:

"My Granfather had owned a cabin on the ridge just south of where the FBI said the sattelite went down. I used to spend my summers up there, so I knew the area pretty well. I guess that's why my ATF unit leader gave me the job to recon the mountain pass up to the impact area."

"I also knew the sort of people who lived up here: MIners, Hunters, Militia, Survivalists. Folks like the unabomber who shunned people, mistrusted outsiders, and especially hated the government. I knew that if people like Oakton had got hold of the government satellite, there was going to be one hell of a fight."

## Level 16: Militia Compound

=====

Teresa's testimony from the congressional record.

"The moment I saw those government agents murder Earl Oakton in cold blood, my entire world changed. I was a trained law enforcement officer, and there I was, unknowingly part of some conspiracy that was way outside the law. it tokk me back to my own roots, where my ancestors had been cheated and murdered in the name of civilisation."

"The situation got complicated real quick, there was no way I was going to kill Oaktons family or his followers, nor was I going to kill ATF agents, who were innocent, like me, but the place was crawling with NSA hiten who were passing as FBI, and I had seen what they were capable of, up close."
