If you want to use this email me. And I will give you permission.

The Legend of Dragoon

Easy Boss Kills:

Get items like Burnout, Spark net, etc. Then, use the turbo controller to do a lot of damage. You can use them against Kongol at the end of disk one.

Gold Dragoon Spirit:

On the country that Disc 2 takes place in, go to the flower city that is plagued by the bandits. There is a bar in the town near the port. When you first go there, the man you need to talk to won't be there. At some point on Disc 2, though, I think it is after you beat the bandits, there will be a jester in there. Talk to him, and he will say that he saw stones just like yours in Lohan. Go there, talk to the merchant who sold you the water bottle, and he will sell you Kongol's Dragoon Spirit for 1000G.

Dragoon Stones:

On disc 4, return to the tower where Dart met his Father (The end of disc three). Right before entering the room his father was in, go to the save point and go to the rooms with all the spirits of the ancient dragoons. Each dragoon will attack you. After defeating the dragoons, each battle will give you the stone for that dragoon. The stones cut the damage from that elemental attack in half.

Safer Battle with Zieg:

When you fight Dart's father at the end of disc 4, you can defend against him and make the fight much easier if Dart has the red dragon armor, which nullifies fire attacks, and the red-eye stone, which cuts magic damage in half.

Easier Battle With Lloyd:

On the third disc have the talisman that prevents an instant death, equiped on Dart only. Do not put it on one of your other characters. This way

you
can use spirit potions on him to keep him in dragoon, and give him his
magic
back. Lloyd will attack only Dart but he won't die because of the
talisman.
Just keep using Final Burst, don't use Red-eye Dragon magic, it does
the
same amount of damage as Final Burst, it just eats your magic up. If he
does
attack another character than just have them heal themselves and the
battle
will be over a lot faster.

Dragoon Special:

Fight in Random Fights until all players get maximum SP and if you get
extra
SP after a while everyone will get a special which appears as a
Yin-Yang.
The Special turns all players into a dragoon, changes the fight place
background, and makes the player who used the special have an automatic
perfect dragoon attack.

Easy Addition Level Up:

In order to perform this cheat you must be able to access the Glaciers
level. Before the entrance to where you fought Llyod in his Divine
Dragoon
mode, to the left is a teleport pad. Down that path is Magician Faust.
I
fought him before I got the Vanishing Stone, but when you attack him,
he
will not take any damage. If you successfully hit with your addition it
will
level up without the hassle of some of your characters being stronger
than
others, and you don't have to worry about the enemy dying too soon
before
your other party members get a chance to hit. When you start to get
down to
low life or whatever, just run away, heal up and go back for more.

Easy Addition and Dragoon Level Up:

After defending Hoax and getting Rose in your group, goto the forrest
where
you are supposed to and then goto the broken castle through that forest
where all of those soldiers are fighting. When you are givin the choice
to
fight or run, fight. Do this for all of them until you get to the last
guy.
When you get to him, choose to run. When you enter that screen again,
everyone will be there. You can do this over and over again. You can
only
level up Dart and Rose's Dragoon because they are the only ones who
have
them at that point in the game.

Get Free HP:

Get into a battle and kill every guy except one and keep guarding until you have lots of HP.

Neat:

If you have a Game Shark put in the code 800BB0F8 01BA then get into any fight and Darts father will be the person that you fight if it's not then get into a boss fight and beat Zeig once you beat him you will get a movie and it will ask you to put in disk 4 this cheat can be done at any point in the game
