B. Gameplay hints and secrets

* If you don't have a gameshark yet, it would be a good time to get one, because this game is impossible to beat it without one.

* Its a good idea to keep any weapon/shield that has a + whatever bonus because later in the game the combine shop opens and you can combine two weapons/armor and CUMULATIVELY addup their + bonuses and special effects.

Ex. (shield + 2 with no rusting) + (shield + 1 with slowed hunger) =
A shield + 3 with no rusting and slowed hunger

* The guy to the left of the house (later in the game) increases your storage space by 10 if you pay him 1000, do it (once every adventure with a max of 250 storage space).

* It is also a good idea to keep ONE of each item (seeds and herbs) in your storage. (You'll see why later)

* Get rid of all staffs and scrolls you read by either selling them, or using them up, UNLESS you want to steal stuff from the Store. THEN you must keep the following staffs:

封印の杖

身代わりの杖

場所替えの杖

へんげの杖

* Rings are ALWAYS a keeper and you should ONLY use インパス items on them because you can predict what Staffs and Pots are without using インパス.

* If you get a scroll that you haven't read before, read it so it gets recorded.

* The bank gives you special items if you have a certain amount of money in your account.

* Dump all of your money in the bank before you go to the dungeon.

* Item Duplication Trick (You need to donate 30000? to the bank first.)

First you need 5 items:

The item to be duplicated.

すいだしの巻物

分裂の壺

白紙の巻物

白紙の巻物

What you do is place the Item and a 白紙の巻物 inside the 分裂の壺, then read the すいだしの巻物. Write すいだし on 2 of the 白紙の巻物. Place one すいだしの巻物, 白紙の巻物 and two of your items. read the すいだしの巻物 and repeat.

* The 鍛冶屋 asks for two items and increases one of your items by +1, (sometimes a +2) and at every 10 times gives you precious information (oxymoron).

10 - The king has athelete's foot

20 - Nene (your wife) is married

30 - The strange kid is raising asagao (a type of flower)

40 - A momonja (an enemy you find in the dungeon) is hairy.

50 - ?

(I gave up doing this because it was stupid)

* You can change your Job to a Warrior or a Magician once you beat the evil

box.

* After you beat the evil box, a new dungeon appears (actually 5 of them). You can go back to the original Fushigi Dungeon and go below Level 27, you can class change to a warrior and go down the Dungeon of Swords, you can class change to a magician and go down the Dungeon of Magic, you can open the box of happiness and go to the More Fushigi Dungeon. Last but not least is the dungeon of the well, which is only accessible after you beat all dungeons. It is located Behind the Furui Yakata.
