i. Introduction  
=====

Hello and welcome to my FAQ/Move List for Acclaim's second WWF wrestling game they released for the Sony PlayStation (in addition to the other major home consoles around the time), WWF Attitude. This 1999 title is the follow-up to WWF War Zone (released the previous year), with more modes, a bigger roster of characters to choose from, and a generally better Career mode to play through. The game features the big-name characters from the time when the Attitude Era was thriving, including the likes of Stone Cold Steve Austin, The Rock, The Undertaker, Triple H and Kane, as well as the many well-known lower and mid-card wrestlers, and is a great trip down memory lane for those who remember the good old days of wrestling! There's also much more customisable features and the ability to create your own wrestlers or PPVs. Overall, there's everything you'd expect to have from any decent wrestling game, and if you enjoyed War Zone, then WWF Attitude is one very much worth playing.

## 1.2. Match Types

---

[0102]

VS

--

As everybody knows, two wrestlers get together in the squared circle and fight it out to the finish. Standard wrestling rules apply in these types of matches unless you change the stipulations around a little. You can win via pinfall, submission or countout.

Tag Team

-----

In this match there are two teams of two wrestlers. Only one superstar from each team can be in the ring at one time, fighting under standard wrestling rules, but if you get worn out you can tag your partner. Only the legal superstars can get the fall. To tag a partner, have your superstar look at them (switch views with L1) and tag with Circle. An illegal man can enter the ring, but only for five seconds, by then they must return to the apron.

2 on 1

-----

Two wrestlers against one...a big handicap for the unlucky superstar. The match is ended when one of the wrestlers on the team of two pins the unlucky guy, or if the one wrestler pins either one of the two other guys.

3 on 1

-----  
See 2 on 1. Only the advantaged team has 3 wrestlers rather than 2.

Tornado  
-----

The same as a tag team match, only all wrestlers are in the ring at once and tags are not necessary. The match ends when one person pins another person on the opposite team.

Lumberjack  
-----

A standard VS match is conducted but there are two extra wrestlers outside the ring who can feel free to get involved in the fight if a superstar gets thrown out of the ring! Keep away from the ropes if you don't want them to drag you out by sweeping you up!

Gauntlet  
-----

One man starts in the ring and fights another. Once he is pinned, another superstar enters and you then start wrestling him. This goes on until you beat 4 more superstars, or one of the four superstars pins you.

Tag Team Gauntlet  
-----

See Gauntlet; Tag Team rules apply.

Survivor Series  
-----

Ah yes...the brilliant Survivor Series. In this match mode, there are two teams of four and two people can be at the ring at the same time. When a superstar is pinned, another one will enter to be the replacement tag team partner. When all wrestlers of one team have been defeated, the match is over.

Royal Rumble  
-----

It's every man for himself in this extravaganza of an event. This unique match has two wrestlers starting in the ring, and more wrestlers appear every half a minute or so. The only way to eliminate a wrestler is by picking him up and throwing him over the top rope (use Atomic Whips or Scoop Slams to do this). 30 men can enter a Royal Rumble, and the winner is the last person standing in the ring.

War  
---

AKA a fatal-four-way, but when someone is pinned or has tapped to a submission,

they are eliminated from the match. The winner is the last person remaining in the ring.

#### Stable Match

-----

Similar to War, but there are four wrestlers in four teams. When someone is pinned, they leave and a new tag team partner comes to replace them. When three teams have been totally eliminated, the last team is declared winner. Eliminated wrestlers remain outside the ring and can fight others who land outside.

#### Triangle

-----

The same as a War match, only there are three wrestlers instead of four.

#### Triple Threat

-----

The same as a Triangle match, only it ends when one person has been pinned or has submitted.

#### Steel Cage

-----

The wrestlers in the ring are surrounded by a tall, steel cage. The winner is whoever can climb over the top of the cage and touch the floor first. But hang on, it's not that simple! You must wear your opponent down until their health meter is red before you can do so. You can whip your opponent into the cage, using it as a weapon to your advantage and help weaken your opponent down.

#### Weapons

-----

You can wear your opponent down with the use of objects like trash cans, microphones, even guitars! There are no rules either, so feel free to brutalize your opponent as much as you desire.

#### King of the Ring

-----

Eight wrestlers compete in a bracketed tournament to determine the greatest of them all! In the quarter finals, four regular matches are played, and the winners advance to the next round - the semi finals - where two winners compete in one match, and the other two in a different match. The winners of those matches go head-to-head in the grand final, where the winner is crowned the King of the Ring!

#### Match Options

-----

These are some stipulations you can choose to have to a variety of matches...

- \* Hardcore Match: Make weapons available in the match.
- \* Cage Match: Have wrestlers surrounded by the cage.
- \* Last Man Standing: When an opponent is knocked down, he must get up by the count of 10 or he loses.
- \* Falls Anywhere: You can pin another wrestler anywhere you want instead of just in the ring.
- \* Toughman: For 2-on-1 and 3-on-1. The disadvantaged wrestler must pin ALL of his opponents when this is enabled.

#### Win Modifiers

-----

Rules for matches you must obey in order to win.

- \* Iron Man Match: Whoever gets the most pinfalls in the amount of time specified is declared winner.
- \* I Quit Match: You can only win by making your opponent submit.
- \* First Blood: The first person to bleed loses.
- \* Finisher Only: You must perform your finishing move on your opponent to win.
- \* 2 out of 3 Victories: Whoever gets two falls wins.
- \* Time of the Match: Determine the amount of time for the match.

Power Meter Colours

-----

Green: You are in perfect health and the risk of being pinned is minimal.

Orange: You're still healthy but be careful and watch out for hard moves.

Red: Danger! If you are pinned or placed in a submission, you'll lose!

```

| Hints and Tips |
o-----o

```

- \* Make sure you know each of the wrestlers in the game well. Know their strengths and flaws, and try to memorize their most useful moves, especially finishers, so that you know how to overcome your opponents.
- \* Use different moves and strikes all the time, rather than simply attacking with the same move. Your opponents can overcome you easily if they know what you're going to try to use against them, and the crowd certainly won't be very impressed with your tactics.
- \* Use double teams when you can in tag team matches. They deplete one opponent's energy very drastically and very quickly.
- \* Use weapons when you can in hardcore matches to deplete the stamina of your opponents much quicker than you would with normal grapples.
- \* Practise with each game mode. You won't become great at them straight away, so make sure you understand how they work, how to win, and the best strategy to use in each of these game types.

Events

-----

House Show/Shot Gun: For the less experienced rookies are are beginning the Career mode, you'll start off wrestling in these events. Win enough matches and you'll be boosted up to compete in the higher-ranked events like Raw and Heat.

Raw is War/Heat: Once you win enough matches, you'll start wrestling in these events. Like House Show and Shot Gun, regular matches wrestled here are worth 1 ranking point.

Pay-Per-View: Winning one of these events is worth 3 ranking points. You may fight a match with special rules or compete for a belt if your ranking is high enough.

Advancing up the Ranks

-----

At the beginning of the Career Mode, you begin at the bottom of the European

Championship ranking, at the rank of 20th. When you win matches, you may go up 1 or 3 ranks, but go down one if you lose a match. When you reach rank #1, you'll fight for the European Championship, and once you win, you must successfully defend it against five challengers. Once you manage to do this, you will enter the Intercontinental rankings, where you will challenge 15 wrestlers, and once you reach rank #1, fight for the Intercontinental Championship at the PPV then defend it five times, before fighting for the Heavyweight belt. After you advance up ten ranks, you'll compete for the title at WrestleMania, and when you win, you've successfully completed Career Mode!

#### Tag Team Career

-----

Like a regular one-man career, only you can have a team-mate and work your way up the rankings for the Tag Team Championship. You can have players on the same, or different teams.

It may not be placed on any web site or otherwise distributed publicly without advance written permission. Use of this guide on any other web site or as a part of any public display is strictly prohibited, and a violation of copyright.

As of 2012, only the following web sites have my permission to host this file, free of charge:

<http://faqs.ign.com/>  
<http://www.lup.com/>  
<http://www.gamefaqs.com/>  
<http://www.honestgamers.com/>  
<https://www.neoseeker.com/>  
<http://www.supercheats.com/>

Only these web sites may host my current and most up-to-date work. I am aware that older FAQs written by me prior to 2012 may also have other web sites stated as being authorised to host my work, and I will continue to allow them to do so, so please do not contact me about it. However, I am only able to keep tabs on my work for so many web sites and due to limited personal time, I have now kept this list comprised to those above for anything I have written as of 2012 and later. If you find a copy of this file on a web site that is NOT mentioned in the list above, it is being hosted against my permission and is therefore violating copyright law. Please contact me if you notice this.

This document, as well as any and all of my other works, is NOT, and NEVER will be permitted to appear at Cheat Code Central (<http://www.cheatcc.com/>). Dave Allison, the webmaster of this particular website is notorious for stealing FAQs and guides from countless authors and hosting them on his own web site, often altering disclaimers to appear as though his site is permitted to host it, and removing GameFAQs and other reputable web sites to make it look like they are not! This is a severe violation of copyright law and authorship rights and has been going on for the best part of the last decade, if not longer. If you have written any FAQs of your own and are asked by this web site to host it, I would personally advise you to politely reject the offer (as accepting would be indirectly supporting FAQ theft), but occasionally check the web site to make sure none of your work has been stolen/alterd and posted there.

All information contained within this file was written by myself, or for any information taken directly from other sources, whether reworded or kept intact, are also clearly acknowledged within this file. If you are writing any literature related to this game, such as an article, review, or even an FAQ or your own and would like to use any small pieces of information from this file, feel free to do so as long as you clearly credit me for what you used. Failing to do so is plagiarism, and again, a violation of copyright law.

Any useful information sent to me will be included in a future update, with full credit given.

Thank you for reading my FAQ, and please feel free to read any of my other video game-related literature, which can be found at:

<http://www.gamefaqs.com/users/RJHarrison>

This file is dedicated to the memory of four late GameFAQs users, each of whom passed away well before their time. Chris MacDonald (d. May 17, 2004), Elliot Long (d. August 27, 2004), Mitchell Lee Stuekerjuergen (d. January 4, 2006), and Steve McFadden (d. June 28, 2011). The latter was one of my closest and dearest friends whom I had met through GameFAQs, and was one of the most well-known and prolific contributors to the site. Steve was an inspiration to myself to take up video game writing and always took the time to speak to me online about gaming or other interests, as well as comment on my writing. Rest in Peace guys, you will all be dearly missed.
