

Please appreciate the time and effort that we have put into making this Guide. We hope the way it is setup will make it easier to use as well as be helpful and informative. This is our Second Guide we have ever created with information we first collected for ourselves ever since this game made it's US debut. We decided we would share more of our knowledge we have collected on this (Yu-Gi-Oh!) game.

We have seen there is many single character guides already put out here. We figured we would make one much more simplistic in finding information that you may need in 1 guide instead of searching through 39 different guides. We should mention that we have not been collecting this information for well over 7 months due to concentration on other information as well as being distracted by other games, but we feel that this information should still help those needing to know where to get some of the more basic cards. This guide has a list of 630+ cards out of the 722 cards.

Please Do NOT email us asking where to get a card that may not be on this Guide. This guide only shows a 100+ duels on each character having persistence, patience and having some luck will help you gain most of these cards as well as dueling MANY times.

////////////////////////////////////
2. Example of how this Character Guide works
////////////////////////////////////

Character's Name

How Many Have been added since the previous update.

Card Number & Card Name (Rating)

Note: We felt there was no point in listing Letter Ranks just Pow and Tec Rating since the main two ranks you can get consecutively is S Tec rank and S Pow rank.

(Pow Rating you receive from defeating your Opponent fast the quicker the better usually in 4 or less turns)

(Tec Rating you receive this from at a slower rate by making your opponent run low or out of cards)

We highly recommend for best results in getting Cards to get both kinds of ratings for the best results on all duelist even though the card drop is random with persistence you should get what you are after.

If there is no Rating next to the Card Name that means one of two things either we weren't keeping track of ratings at that time which means it could be either a Pow or Tec or it's just a POW Rating and have not received it with a Tec Rating yet.
