I. Informations

This guide is for private and personal use only. It is not to be used for any profitable or promotional purposes. Use of this guide on any webpage may only be granted by my permission. All the informations written in this guide is the result of several hours of game play and a lot of work to figure out how to produce a glitched finishing move. This guide only apply to the Super Nintendo Entertainment System version of the game.

II. Scorpion

As soon as you hear the "Finish him! / finish her!" message, throw your opponent by pressing "low punch" (close to him), then quickly press "up" twice to perform Scorpion's finishing move. The opponent will burn while he's still on the ground!

III. Sub-Zero

It's possible to kill your opponent by freezing him. Just do uppercuts and throwings until your opponent's life meter is 99% empty, then freeze him. Enter Sub-Zero's finishing move (foward, down, foward, high punch) to create a clone of your opponent! Practice yourself by playing alone in the 2 players mode, it's by far the easiest way to perform it.

IV. Liu Kang

At the finishing time, wait to the very last second and enter Liu Kang's finishing move (whole circle) . Your opponent

is going to fall by himself just before you hit him! Do it on the pit stage to create a bigger effect.

V. Sonya

Just like the Scorpion's finishing move, you can enter her finishing move (foward, foward, foward, back, back, block) while she is throwing your opponent. But you wont be able to do it if you throw him only by pressing low punch, so you'll have to perform her LEG GRAB special move (low punch + low kick + down + block) instead.
