2. Release notes

Yep, this is it. You probably noticed that some puzzles have more than one solution. Some of them are "mirrors" of others, some are not, but you can be sure all of them are right under your nose right now.

No, I'm not crazy, I just developed a little program that does that. It works for custom levels, too. If you want to download it, just head your browser to the following :

http://agora.ulaval.ca/~frgin45/TAPS_10.7z

You'll need a 7-zip extractor for that. If you don't have one, <http://www.7-zip.org> is the place to go (and it's free, of course).

Every move is noted this way:

Move #1: H=2-3, V=4

In this example, the blocks that are to be switched are the 2nd and 3rd ones from the left, in the 4th row (vertically).

Some of you may notice that some "special" solutions are absent. Indeed, for some levels, you can use the "skill chain technique" and find other solutions, sometimes in less moves than expected. TAPS doesn't find these solutions, and I don't plan to add support for that in the future.

Please note that this program may still have bugs, so if you find a non-working solution, or a solution that is not listed here, please email me at my hotmail address :

juef17 (don't forget to add the @hotmail.com part)

Have fun! And don't spoil the fun of self-solving too much :OP

4. Misc stuff

If you have any question about this just mail me at the address I've previously mentioned.

I'm 20. I'm studying mathematics at Université Laval, in Quebec City, Canada. After following a programming course at school, hearing that I wouldn't be able to use my Internet connection for a week (and getting stuck on level 5-04 in Tetris Attack), I've decided to write this little piece of software. I've written it for fun and personal use, but since I got so proud of it I've decided to release it publicly. Please bare with my pityful English. It sucks, I know. Sorry.

Thanks to my girlfriend who has been kind enough to forget about me for a few hours, during which I've prepared all this.

Thanks to every GOOD math and IT teacher. They rock.

Thanks to Nintendo for creating such a nice and addictive game.

Thanks to Microsoft for creating a C++ compiler I like.
