

Chaos Seed Item/Excavation

by WalterFeng

Updated to v1.0 on Nov 7, 2016

Introduction

Acknowledgements

The English item names are taken from Dynamic Designs fan translation of Chaos Seed. The translation patch can be found at the following sites: <http://www.dynamic-designs.us/chaosseed.shtml>
<http://www.romhacking.net/translations/2181/>

The rest of the item data was taken from an Excel file on a Japanese site found here:

A Quick Word Regarding Item IDs

For those that want to alter their inventory using PAR codes, I've included the IDs of every item. The PAR codes 7E4708:XX (first slot) through 7E470F:XX (eighth slot) correspond to the eight slots in your inventory, with XX being the ID of the item you want. Be careful using these codes as they can overwrite any items currently in your inventory, including quest items. It's a good idea to just use the last slot or two when messing around with your inventory.

Excavation Data

This chart lists the data of all items attainable through the Excavation Room. SN is how much Sentan is needed to retrieve the item. Excavation time (in timer ticks) is reduced by how many red dots are enclosed in the Excavation Room. Room Excavation Level shows which items can appear at which excavation levels. Using the excavation time and room level, you can deduce what items may appear when the excavation is done. With this information, you can use the "Stop Digging" command to re-roll until you get a favorable set of items you want.
