+-----+  
& 1.0 Introduction &  
+-----+

This FAQ is a transcribed game script of the quotes from the game EVO for the SNES. Its purpose is to serve as a quick and easy reference to all of the dialogue in the game using an easily searchable format.

This is NOT a FAQ to help answer gameplay questions. There are plenty of other FAQs that do that really well. This FAQ will contain spoilers, obviously, so be forewarned.

The main protagonist in this original platformer is of the silent variety, so typically the speech in the game is of other creatures speaking to him.

During parts of the game where there are typos and grammar mistakes, I wrote them down exactly for the most part. So although I may have made a few typos, some of them are intentional.

I ask that people do not lift my guide or portions of my guide without asking my permission or without giving me credit.

Now, without further ado, I present the story of EVO - The Search for Eden.

```
+=====+
&                2.0 Prologue                &
+-----+
```

About 4.6 billion years ago, the "Sun" had nine smaller stars and named the third one "Gaia."

The Sun: "My dear, Gaia! Please listen to me. From this time forward, every 1 billion years, you will have children called "Life". One of them will be able to help you to build a new era. Each child must endure a difficult trial. You might think it's too sever, but it is necessary. The trial is a test of Nature: 'The survival of the fittest'. If he passes, I will allow him to be your partner and to enter Eden.

\*If you're defeated:

Gaia: Sorry! You've been defeated. I will revive you. Please keep this a secret from my father, the Sun. Your EVO.P has been reduced slightly.

```
+=====+
&          3.0 Chapter 1: The World before Land (500-450 Million B.C.)          &
+-----+
```

Gaia: Hi! My name is Gaia. I am the one who watches over all life, including you. You will journey through many periods of time on this planet. A journey of change. The journey will not be easy. Only the strong will survive. This is a trial given by my father. I hope you can survive this trial and meet me in Eden. This will be the end of your journey. Well the time has come. You may go now. You are already a fish. It took 3 billion years for your body to evolve. You must travel alone. Please be careful. Good luck!

Jellyfish: "What! We have another newcomer?" Welcome to the world, where the rule is only the fittest shall survive. Look newcomer! You better listen to the rules of this world. There are the three. One- "Fight for survival and for food." Two- "Only move forward never back." The last is, "Evolve and become strong." Well, this is a very dangerous world isn't it? Are you afraid of it? The weak and flabby will be easy to defeat. What about you, newcomer?

Rumors circulate among the cucumbers. "The Angler's horn attracts enemies because of it's great light!" "They say we can't return here if we cross the third volcano in the sea. It is Gaia's plan to lead the fish to a new world." "Hmm... A new world."

Something in your body speaks?!

Yellow crystal: How are you progressing? Don't worry I will help you evolve. You may call me crystal. I will give you advice on how to evolve. Evolving your jaws will increase your biting strength. Evolving your body will increase your defensive power. Evolving your horns will increase your attack power. Evolving your hands, feet and dorsal fin as well as your tail, will increase your Hit Point level, agility and strength. Be careful, evolving one part of your body may decrease another part.

"Hi there fish!" "Try eating a red crystal. You may evolve into a strange creature."

Crystal Power causes mysterious Evolution. Mysterious Time Stream evolves you.

Crystal Power doesn't work yet. Return to former body. Mysterious Time Stream evolves you.

There is a wall of bubbles.

The wall of bubbles has disappeared because of the explosion from the volcano.

The Seaweed whisper to one another.

Seaweed A: "Friends, the strolites are trying to create a new world using oxygen. They are having trouble because the Kuraselaches keep interfering with them."

The Strolites whisper to one another.

Strolite A: "If we could move along the bottom of the sea without sticking, we would not have to be ruled by the Kuraselache."

Strolite B: "Shhh! Speak quietly or the leader in the cave will hear you!"

Huh? Who are you? Knowing this is the domain of the Kuraselache, King of the Sea, why are you here? Are you not trying to help the Strolites build a new world? The Sea is the only world! I will defeat anyone who helps the Strolites!

We are the Strolites. Outside the sea a world filled with oxygen is being born. The entrance is here.

Okay, let's go. A "New World" awaits you.

Change of circumstance causes evolution.

Gaia: I am Gaia. The "Fish Age" lasted about 2 billion years. As it ended it gave way to the beginning of a new world. One filled with oxygen. It is called the "Land Age". The Strolites and plants have already begun living here to prepare a better place for those who choose to follow. Here is a present for surviving the Fish Age. It is the body of an Amphibian. You have lungs so that you may breathe and you may also move about the ground freely. A new adventure awaits your new body. So----. Great Power-. Please give this creature a new body. Let us go to the Era when the creatures reached land. We shall use the Time-Trans.

+-----+  
Gaia: The next stage is the age of Amphibians. Amphibians, Ikustega and Insects which were the first to arrive have already lived on land. There should be a lot of large plants growing there, but something is wrong.

Yellow crystal: "EVO tip." Welcome to the world of Amphibians! If you evolve your tail, you will increase your jumping ability and your HP.

You hear someone whispering in the air above you.

Whisper A: "Captain! The Green Crystal has the power to change your body back to the way it was before, doesn't it?"

Whisper B: "Ye-----s!"

Whisper A: "But Captain, isn't it wrong to operate the process in reverse? This crystal must be bad for the Evolution process."

Whisper B: "Absolutely not!"

Whisper A: "I will not responsibility for anything that happens."

Whisper B: "-----It is still good for the future of this planet-----"

Coelafish: "Um... We are Coelafish. It is very difficult for us to evolve or fight against other creatures. So, we stay as we are."

Get out stranger! This land is owned by the elder who takes care of plants.

Debustega: I congratulate you on passing through the protected land. But this is the final area. I am the strongest of the Ikustega family. I am.... Debustega. Bu.. Bu.. Did you laugh at me? Do you think my body looks funny? I know you are laughing at me. You make me very angry! I am going to defeat you!

Elder of Ikustega: "You are great!"

Child of Ikustega: "You are strong!"

Elder of Ikustega: "Considering your great strength, I have something to ask you. Could you do me a favor?"

>>Yes

>>No

If no:

Child of Ikustega: "Please, please listen to Granpa's story!"

If yes:

Elder of Ikustega: "Thank you. Actually, this land used to be covered with plants. Suddenly, insects started to evolve extremely abnormally. These insects ate all of the plant life leaving this place like a desert. They are trying to eat any remaining plants around the area. They refused our proposal to coexist. Now they are attacking our people. The father of this child went to try and persuade them, but he has never returned."

Child of Ikustega: "---- Dad ----."

Elder of Ikustega: "Could you please help us?"

Child of Ikustega: "Save the plants!"

If you kill either Elder or Child Ikustega:

Gaia: "Ah.....h!" "What are you doing?"

Profasu (Ancestor of Cockroach): "Those pesky Amphibians are coming again!"

"Pant, pant..." I was supposed to try and persuade the King-Bee, but I have been badly injured. Is there anyone who can tell the King-Bee how important living in peace is? Sir ---, you look very strong. I have a favor to ask of you. I am about to pass away soon. Please eat the food I have collected so that you may become strong enough to defeat the King-Bee. If you can defeat the King-Bee, it will enable the plants to recover and grow again. But.... I wish I would have met my son before I pass away. Sighhh... ....Farewell, my son.

King-Bee: "Here comes another Amphibian." "You have evolved strangely. Did you use the crystal's power?" "As I said before, the only way to satisfy our large appetite is to devour all of the plant life we can find." "If you feel the way we have chosen to live is wrong, maybe you should change it. You may only change it one way though. By force!"

Ha...ha...ha... I am a dragonfly. You may call me Megausu. You got it! I didn't agree with the way of the King-Bee either. I will give you some advice. You have no strong enemies ahead. At this point you don't need to evolve. The Sand-Eater in the next area is very strong. I suggest you run away.

Elder of Ikustega: "Recently the insects have become quiet."

Child of Ikustega: "I wish dad would return soon."

Edasaurus: "You can't get through here if your body is still the same." "It is the Era of Reptiles. The Era of Plants and Insects has ended."

Megausu: You are a failure. You should have listened to our orders. Hail Queen-Bee!

Queen-Bee: It was you, Amphibian, who defeated my husband the King-Bee. You have destroyed the laws of our Insect society. I feel it was unfair that only our society be destroyed! The Amphibians must be destroyed too. I shall destroy you first for defeating my husband.

"Balance of Nature" which the giant insects destroyed will recover. The plants that were totally destroyed will grow back again. The ground will become an ideal place for all creatures again. Okay, here is your new body. It is the body of a reptile. You can evolve into many different things with this body. Great Power! Give this creature a new body!

+=====+  
& 5.0 Chapter 3: Age of Dinosaurs (200-65 Million B.C.) &  
+-----+

Gaia: By the way...

King Bee: "Did you say you were larger because of the Crystal? I never made a Crystal that would make bodies larger."

Gaia: Something strange... The next time period is a place where all creatures

compete for power. These creatures are called "Dinosaurs", because of their strength.

Yellow crystal: "EVO trip" You can evolve in various ways in this Era. If you choose two legs, you will be able to jump higher. If you choose to have four legs, you will have stronger defense. If you choose four legs, your ability to jump will be limited so be careful when choosing.

You hear whispering coming from somewhere.

Whisper A: "How many reptiles have challenged Mt. Brave?"

Whisper B: "Only a reptile with true bravery may be eligible to build a new age."

Whisper A: "I believe Mt. Brave is a good target to overcome. This will help us choose the Chosen One."

Whisper B: "I feel an ominous hunch..."

Ribit...ribit, ribit! We are the slimy amphibians. What's wrong with slime? Huh. Ribit, ribit.

We are the ones who watch over the plants. Recently reptiles have eaten so many plants, we have become worried.

Hey! You! Don't get involved with the crystal. It causes creatures to evolve in strange ways. We don't depend on it. We evolve in the right way, with steady effort. Look at my excellent head butt.

My child is missing so I am very angry! Please go away or I will become angry with you as well!

Prime frog A: "You do not like slime?"

Prime frog B: "What an insolent Syrocosaurus child!"

Syrocosaurus child: "Stop it! I don't like it!"

Prime frog A: "Ahh! Reptiles are coming. Run!"

Syrocosaurus child: "Help me!"

Mother of Prime frog: Ribit, ribit... "Is it you who scared my children? Well, you must not know... We are the Prime frog family. Even reptiles fear us. I will teach you a lesson. Attack, my children! Attack!"

Syrocosaurus child: "The Reptile helped me when I was in trouble." "I forgot to thank him for his help."

Syrocosaurus father: "Well if you meet the reptile, tell him about the legend." One day a dinosaur climbed to the top of Mt. Brave. At the top he was given a chance to become a new creature. If he took the chance he would give up most of his capabilities. He decided, after much hesitation, to make the change. He was admired by all for the courage he had shown by changing into a new body. This body had capabilities which no other creature had. He changed his name to "Ptenodon" and left for a new world. (Would you like to hear it again?)

>>Yes

>>No

Whisper A:

"Hey there reptile!" Here is the entrance to the sky world. Try to jump into it without hesitating. But if something goes wrong in there remember it was your choice!

Celebration for your bravery! You evolve "Birds".

Pronosaurus: "Hah! What a stupid creature. It has been a long time since we have seen a daredevil. Let us howl to inform the other Pronosaurus that a stupid creature is approaching." Ooofff....

Omasaurus: "Oh! What a creature to come here!" "Tyrasaurus will be upset unless we defeat it. Let's go."

Ha ha ha... I guess I will have to believe you are actually here. We are the Tyrasaurus. In this world we are the strongest creature to receiver power from the crystal. Defeating you will be as easy as lifting a baby. But, you seem to have promise. Well, will you join us in ruling the world?

>>Yes.

>>No!

If yes:

Don't you want to reconsider?

>>W-wait...

>>I've made my decision.

If yes again:

Well, well! Hahaha...

You have decided to become a follower of the Tyrasaurus. We shall take a look at your future. No one will go against you anymore. You can continue to eat them all. Thousands of years have passed... and then...

What is that? Something is falling. Please help! This is the way the Dinosaurs, once prosperous, were annihilated.

Now we can only see them as fossils. Of course you would be a fossil and exhibited in a museum.

If no:

What you turn against Tyrasaurus?! You are unwise! Ha ha ha... so now you must pay your debt!

Watch out! The river of asteroids is breaking apart! It is about to fall to the ground! A great number of rocks are dropping! Hurry up! Hurry, get out of here!

You barely escaped! However, at that time the world of Dinosaurs was.....

Gaia: What has happened? The dust caused from the asteroids created a very dense cloud blocking out all of the sun light. The temperature in the land was dropping. Many of the Dinosaurs could not bear the cold weather and passed away. This is a sad incident referred the "Extinction of the Dinosaurs". It will be talked about for generations to come.

---

Mt. Hidden Mammals

Deltadium: "Time will come for us!" Choo.. "Oh, enemies are coming!"

---

In the River of Asteroids

The dinosaurs beneath us don't think about anything. They don't understand creatures with intelligence will rule the land, not creatures with strength.

\*An alien showers a dinosaur with radiation\*

Don't bother me now! I am in the process of receiving more power for my brain.

An asteroid field is approaching. If it hits, the world beneath would be severely damaged! It will be alright.

```
+=====+
&                6.0 Chapter 4: Ice Age (65-36 Million B.C.)                &
+-----+
```

Gaia: From now on, a new life form called "Mammal" will be born. You have a chance to become one.

Yellow crystal: "EVO tip" Evolution is slowing down in this age. Reptiles change very little and they will have few enemies. You must be careful! Evolution is slow among the Mammals. You will struggle against strong enemies. Someday you may evolve into a creature known as a "Human Being."

We are very happy living without fear of our enemies, although we have weak bodies. Syrocosaurus family over there has something to tell you.

I was told by Gaia to give you the power to become a Mammal. I was also ordered to check if you deserve to become a Mammal. In order to make you a Mammal, we have to use some of our "Spirit Power" called "Hope" from our people who have been defeated. I must judge you. Congratulations! You deserve to become a Mammal. You will not be able to return to the form you are in now if you decide to become a Mammal. How will you choose?

- >>Evolve to a Mammal.
- >>Stay as you are.

If evolve to Mammal:  
I got it. Great Power! Give this creature a new body for this Era.

If stay as you are:  
I got it. I admire your courage. When you change your mind come back here at anytime.

Rumor from Deltadium.

A: "I am afraid there are still dinosaurs alive."

B: "They will not be able to withstand the cold. They will perish soon."

C: "I would be more interested in the white two legged creature living in the West Continent." "They are defeating the Mammals trying to evolve." "I am so scared!"

Oh! I have been discovered! We survive with much difficulty, leave us alone!

There is a door of ice. It is too heavy to move.

Tyrasaurus: "Oh! The Yeti are coming!" What! Oh, my mistake. I feel better now.

Balrium: "Even though we escaped the Yeti, it is too hot for us Mammals to

survive here in the desert."

Mammoth: "We are the three brothers of the Mammoth. Even the Yeti is afraid of us. What are you? Whaaaaat? Well, you are a part of the Yeti family aren't you? Yeah, you should be! Hey, brothers! The enemy is here!" Pahoom....

Mammoth Gal: "Oh my! I thought the Yeti had attacked us but it wasn't true. The Mammoth brothers had been proud because the Yeti had not come yet. The Mammoth brothers said it would be very easy to defeat the Yeti if only they had the crystal. By the way, you are very strong. I will tell you a secret. There is a mountain in the Southwest and you can find the Ice Pole spirit there. It was said if you close the Ice Pole, you couldn't come back to this world. Please be careful."

Ha...ha...ha... Here comes the slave.

Another fool is coming.

Lower creatures are invading.

Bird-King: Come on you vulgar creature! I am Bird-King, boss of the Bird-man. I am the leader of a great tribe that has continued to evolve, though we lost many people by the falling asteroids. Listen to me! This is an age of intelligence. Creatures beneath us still stick to changing their bodies for strength, but they will remain stupid. We had a sage who came from the Universe. Using the crystal he gave us, we will rule the world the way the dinosaurs couldn't! Finally we will start a journey to the Universe! Would you like to join us?

>>Yes

>>No

If yes:

Well you are very smart.

We shall look into to your future. That is the way you have gone into the universe with the father of the Bird-man. You reached the nearest planet, the Moon, and you will create the Bird-man civilization. But you will return here sometimes.

What is that? Master! Master is coming down from the sky. Humans were surprised and drew figures of you in the desert. Such drawings remain throughout for thousands of years.

If no:

Ah you are a traitor! The crystal will teach you a lesson.

Bird-People: "Good gracious! The castle is coming apart because the power of the crystal is gone. Everybody better leave!"

Yeti: Destroy the creatures. Destroy them! That's my destiny. Hahaha... "Ah, who are you? How did you get in? I've got it. The big explosion from the sky broke the ice entrance. That was a big one! I am Sir Yeti. I rule the Ice World using the power of the crystal. I become angry with weak Mammals who try to become strong. You seem to be different. Have you evolved yet?

>>Is something wrong.

>>I stopped evolving.

If something wrong:

Well, you have a big mouth! Join the rest!

If stopped evolving:  
You are a liar! You must pay!" Ha ha ha...

Yeti: "I can't believe it! Why me? What has happened to the power of the crystal? Junior....!"

Yeti Junior: "What! Daddy...!"

Yeti: "I couldn't believe there existed such a strong creature in this world. This was my mistake."

Yeti Junior: "Daddy, be strong!"

Yeti Mother: "My dear! Where are you? I am afraid... I can't forgive you for defeating my husband. This time I will defeat you!" Gee... .

Yeti Junior: "Daddy! Mommy!"

Yeti Junior: "Daddy! Mommy!"

Yeti Junior: "Daddy! Mommy!"

Gaia: I am Gaia. It has been painful but you must see the real world. Even if you had not defeated the Yeti, I believe they would be beaten by a stronger power. Let us move forward. This is the only way you can go.

+=====+  
& 7.0 Chapter 5: Early Man (26-3 Million B.C.) &  
+-----+

Gaia: I am Gaia. The Ice Age has come to an end, A new age full of life, has begun. I believe Mammals will be prosperous from now on. Although the Dinosaurs are extinct, the rule: "the survival of the fittest" remains. By the way... I think you already noticed that someone delivered an evil tool, a Crystal, to this planet. I wonder why and who? Anyway there is something wrong with evolution of life on this planet. The Crystal... I have a bad feeling. Come, you are close to Eden now.

There are creatures who can hold things in their front legs called "Tools". Be careful with them because they can cause much damage.

Hidden Segosaurus: Wah! "Here comes another enemy!" "Don't attack us please! We like to live in peace." "Please leave us alone!"

>>Let them be  
>>Do not let them be

If let them be:  
"Really? Thank you!" "I will tell you a secret for your kindness." In the cave at the Southern continent, there are strange creatures no one has ever seen before. They evolved with the face of a cat and the body of a rabbit.

If do not let them be:  
We can't help it. We have to fight to protect ourselves.

Hey! I saw it! I saw a silver shining object like a bird flying. I've never seen such a bird!

We are the Amphibians who monitor the plant life. We are pleased to see the

plant life increasing. We will continue to monitor the plant life as long as the sky is blue.

---

Secret Area in Domain of Condor (only accessible if you're a bird)

You hear someone whispering.

Whisper A: "We should stop the evolution experiment."

Whisper B: "I agree with you."

Whisper A: "We have continued this experiment to try and avoid the evolutionary mistakes our ancestors made. But this was wrong. Recall all of the crystals used in the experiment!"

Whisper B: "I am afraid some of the creatures learned of the power of the crystals."

Whisper A: "What!? Only beings from our tribe can understand the secret of the crystals. I wonder... Are there other creatures like us."

If you bite the flying saucer:

Wah! Forgive us we were wrong! We regret our action, and we will never interfere again. Forgive us!

>>Forgive them

>>Don't forgive them

If not forgiven:

I am sure you will do it. Good-bye.

If forgiven:

Thank you so much. What an open minded creature! For your kindness we will take you to our planet.

And then you went to their home. During a long journey you heard about stories from them.

Whisper A: "We are the Dino People. We evolved more than a billion years ago. We live peacefully nowadays, but we made many mistakes and almost destroyed our planet."

Whisper B: "I was afraid you would evolve in the same way and make the same mistakes we did. That is the reason we delivered the Crystal. However, I was meddling and I apologize."

Whisper A: "We should be able to see our planet soon."

Then you will be welcome to their planet, Mars. After staying for awhile, you may come back to Earth safely.

\*End of Secret

---

We are the Monkey Human tribe. We can use tools by the power of the crystals. We have to keep such crystals in our hands. Oogi..

Are you surprised? This is a special elevator. If you choose the direction, it will take you there automatically. This is a very convenient device. The

creature living in the East taught me how to make this.

Yeti: "Who did it? I wonder who came into our sanctuary without permission. No one can damage the Yeti burial ground. Oh, I can hear, the sad voices of our ancestor." "Daddy!" "Mommy!" "Finally the time has come. We should revenge our Yeti humiliation. I will not waste my time. Our humiliation will end!"

Gaia: I am Gaia. Please do me a favor. The crystal turned the Rogons into violent creatures. They have been attacking the whales. Please defeat the Rogons and save the whales.

We are Rogons. We have evolved from fish. We heard some creatures from land took over our domain, so we are going to attack them. By the way, you look like...

You are the one who helped the whales. We are protected by the power of the crystal. We Rogons can only rule the sea. We can not allow whales to stay. Once they evolved themselves to become creatures of land, now they have returned to the sea to oppose our rule. The sea is our new territory. Well, I have a point do I not?

>>I agree with you.

>>I don't agree with you.

If agree:

That's right. I am very pleased with your progress.

We shall look into your future. The Whales and Rogons were invincible in the sea. There was no one to go against them.

Rogon: "Eat! Eat! Eat them all! We have the strongest power. The strongest one will control this planet."

Rogons conquered all the sea. Even the strongest sharks and whales with great intelligence obeyed him. Thousands of years have passed...

Rogon: "What is that! I can't believe such a large fish is here." Something is falling.

Fisherman: "What is this fish? It has a very strange shape."

Captain: "I don't care. We will grind it down to fish cake."

Rogon: Ahhhh! "Help me!"

After you lose a leader, you will get lonely and start to wander.

If don't agree:

What! You side with the whales! I don't approve of you.

Whale King: "Thank you for defeating the Rogons. I was afraid they would continue ruling the sea by using the power of the crystal. I am very relieved. I wonder if you are the chosen one. Can you save this world created by the crystal? We will blow the cloud over the mountain in Eden away using our will power. Go back to the land. I will give you a new body so that you can fight on land again."

Please listen to my story. A long time ago, our ancestors built a castle that reached far into the sky. They had tried to reach the universe but were removed by some strange force. That is why we don't have wings.

Bee Queen: How great the one living in the North is. He made us big again and we are very grateful. We can't let you pass here because we are showing our respect for him.

Tyrasaurus: We were nearly to the point of extinction, but the one living in the North saved us. He made us into a very important ancestor.

It is cold, very cold. Who are you? I've never seen you before. I am Cro-Maine. I am the guardian of this cave which leads to Eden. Once I belonged to the Monkey-Human tribe but they didn't like me because I had less hair and was smarter than the rest. When I was alone, one being in the cave treated me very well. He ordered me not to let anyone pass here so I can't let you in.

Why did you come in? We are the Dino-People. We escaped extinction and evolved. We are the only ones who use the crystal. It is too dangerous to keep this crystal. We must seal off the crystal immediately. Until then no one may enter Eden. Go home. If you don't go home you will regret staying here!

Dino-People: "Good gracious! The pot containing the crystal has exploded!"

Bolbox: You are the one trying to obtain entrance into Eden with help from Gaia. I am Bolbox, the strongest creature in this world. I have evolved into a caveman by eating the crystals the Dino-People have collected. I will go to Eden. I am the most suitable partner for Gaia, together we will rule the future. I've got some bad news for you. You will not make it to Eden. This is the end of your journey.

+=====+  
& 8.0 Epilogue &  
+-----+

Gaia: I am Gaia. Thank you for defeating Bolbox. We would not have had any future in the land of Eden if they would have come here. Let us go to Eden. Finally we are close to the end of Evolution.

Gaia: I am Gaia. Finally you have reached Eden. You have passed a severe test of nature. You have completed the trial: "Survival of the fittest". Our future is before us. We can control our destiny. Let's continue our journey.

Whisper A: "After all our attempts we were not successful."

Whisper B: "That is correct. It was our pride and I am very sorry we intervened in the evolution of this planet."

Whisper A: "I think it is okay now. They can become even better creatures now than we ever expected!"

Whisper B: "You are right. We should advise them only if they have a real problem. We should watch over them with a kindness."

Whisper A: "It shall be done. We will do this until our culture has developed on Mars."

The Sun: "You have been chosen by Gaia and have completed the trial. From now on please be a good partner to Gaia and create a wonderful planet. I would like to give you something called "Intelligence". You can create a "Civilization", and help the world prosper by using your "Intelligence". Please be careful and

use it wisely. If you use it improperly you will have a much harder trial than the one you just experienced. If you choose wisely, you will create a wonderful world. We will give you the land of Eden and accept you into our family, the Sun family. Go to Eden with Gaia."

Listen everybody! We will begin a new age.

END.

### 9.1 Legal Stuff

This FAQ is Copyright 2005 by me. Any publishing of this FAQ without my explicit permission will be in a world of trouble, and I will find out if that happens. EVO - The Search for Eden is the Copyright product of Enix. I am not in anyway affiliated with the company or its employees.

---

### 9.2 Emailing Me

I'd love to hear any commentary or questions about the Script. I can be reached at [tasteless@gmail.com](mailto:tasteless@gmail.com)

If there is something missing with the Script, please feel free to email me the amendment and I'll try to fix it.

Do NOT ask me where to get a copy of the ROM. These emails will go straight into the trash.

---

### 9.3 Version History

11/27/05 - v1.0 First and complete version of the game script is submitted to GameFAQs.

---

### 9.4 Special Thanks

Special Thanks goes out to Enix for making a great game and providing the script which I have humbly ripped off.

Thanks also goes out to GameFAQs for being one of the greatest resources on the internet.
