GETTING STARTED

Press any button to arrive at the top of the cabinet. After you exit the cabinet, you will be able to move around to the various games available in the cabinet by walking up, down, right or left.

VIDEO POKER

HOW TO PLAY VIDEO POKER

The video poker machines are located in the upper left corner of the cabinet. Move the pointer to the machine of your choice (there are 5*, 5x, 5/25 and 5/100 video poker machines) and press the B button. The machines that accept the smallest denominations are closest to the coin.

AT THE PLAYING SCREEN:

TO BET: Press the A button to drop coins in the slot. The amount you bet under the B amount of the machine on the right side. The number of coins you have bet is displayed in the upper right corner. Keep pressing on the A button until you have bet the desired number of coins. The machine will automatically begin dealing when you have reached the maximum bet limit of the video.

If you wish to cancel your bet on video poker, you must press the B button before you have bet the maximum of five coins.

THE DEAL: Once you have placed your bet, move the pointer to the DEAL button and press A. You will be dealt 5 cards. If you wish the to replace some or all of your cards, move the pointer to the button

below the card you wish to discard and press A. If you decide to keep a card you have discarded, press A on the button beneath that card. Press B when the pointer is resting on the DEAL button to receive more cards. Before you press the DEAL button, examine the cards; you have chosen to discard.

TO WIN: You must have one of the following hands to win in Video Poker:

RANK OF VIDEO POKER HANDS

The following card combinations have value in Video Poker. They are listed in order, lowest ranking hands to highest ranking hands.

1. One Pair - This means any two cards of the same rank (aces or better).
2. Two Pairs - This means two cards of any one rank plus two cards of a different rank.
3. Three of a Kind - This means three cards of the same rank.
4. Straight - Any five cards in sequence (but not all of the same suit) make a straight.
5. Flush - Any five cards of the same suit constitute a flush.
6. Full House - Three of a kind and a pair make a full house.
7. Four of a Kind - This requires any four cards of the same rank.
8. Straight Flush - Five cards in sequence in the same suit constitute a straight flush.
9. Royal Flush - The top five cards in sequence in the same suit (A-K-Q-J-10). These cards may appear in any order on your screen.

WINNING

When you have a winning hand, you will see your money fall into the coin tray. If you don't want to watch all of your new found fortune accumulate, press the A button. Now you are ready to play a new hand or you may exit to the main floor by pressing Select.

TO START A NEW HAND

The last hand you have played will remain on the screen until you press the A button. The Dealer will then deal you five new cards.

SLOT MACHINES

In 1887, American inventor Charles Fey made the first slot machine in a small machine shop in San Francisco. Called the Liberty Bell, the first slot machine was manufactured by hand and contained three wheels with colorful fruits, diamonds, spades, bells, horseshoes and stars printed on them. The machines were an immediate success and are now found in all parts of the world.

HOW TO PLAY THE SLOT MACHINES

If you want to try your luck at the slot machine, you'll find them in the upper right and middle right areas of the casino. Move the pointer to the machines of your choice (there are \$1, \$5, \$25, \$100, \$1000 and \$10000 machines available in 3 reel or 4 reel progressive versions) and press A.

AT THE PLAYING SCREEN

Move the pointer to the slot slot and press A to drop in as many coins up to the maximum for that particular machine as you would like to bet. When you have finished betting, move the pointer to the handle and press A to start the reels spinning.

PAYOUTS

Look up to the top of the screen to see a display of payouts for the alignment of various symbol combinations. If the symbols showing horizontally on the payout lines, when the reels stop spinning are a winning combination, you will be paid out the correct number of coins.

TYPES OF MACHINES

There are two types of 3 reel machines and one type of 4 reel.

THE HOUSE OF ROSE: This is a traditional 3 reel "fruit machine". It offers smaller payouts than the other machines, but the payouts are hit more frequently.

WAGONS OF GOLD: This is a 3 reel machine that displays just yourself, 3 covers and cherries. The payouts are hit less frequently with this machine, but the payouts are bigger.

With both the HOUSE OF ROSE and the WAGONS OF GOLD machines, you may have up to three payout lines. Depending on how many coins you bet:

- Insert one coin and your payout lines are the middle line.
- Insert two coins and your payout lines are the top line and the middle line.
- Insert three coins and your payout lines are the top, middle and bottom line.

The amount of coins that can be bet is equal to the number of payout lines the slot machine has.

FOUNTAIN OF FORTUNE. This 3-reel slot machine pays out the better the reels. Each additional coin increases the size of your jackpot, which means it must be your lucky day. You can only win the progressive jackpot if you bet all three coins.

TO SPIN THE REELS AGAIN: Once the reels have stopped and you have seen or lost your bet, press **A** while the pointer is on the coin slot to start the betting for the next spin.

TO EXIT: Press Select once the wheels have stopped, getting to take you back to the main menu flow.

CHIP TRAYS

When you play the 50¢ slot machines (MONEY WHEEL, NOUVEAU, or BLACKJACK), you will use a chip tray to store your bets and to make your own change.

Each chip tray has 5 columns of \$100, \$25, \$50, \$5 and \$1 chips and each column can hold 32 chips.

You can have up to 32 chips of each denomination in your chip tray. If you have more than 32 \$100 chips, you will not be able to use all of them in their designated column in the chip tray. If you drop more than 32 \$100 chips, you will see them begin to disappear from their count.

A WORD ABOUT WINNING

If you win when playing Blackjack, the Money Wheel or Roulette, the word **WINNING** flashes along with the amount of money you have won for that particular round of play. The amount that is flashing does not include the amount of your bet for that round, which is also returned to you.

REDEEM CHIPS

If you run out of \$1 chips, move the pointer over to the \$5, \$10 or \$25 columns and press the A button when the pointer is resting on the chips of your choice. When you have a chip attached to the end of your pointer, move the pointer back to the \$1 column and press A again. If you have taken a chip from one of the \$5 columns, you will now have two \$1 chips. If you have taken a chip from one of the \$10 columns, you will now have ten \$1 chips and so on.

Or, if you like, you may also move one of your \$1 chips over to one of the \$10 columns and press A. This will change ten of your \$1 chips into one \$10 chip (ensuring you still at least 10 \$1 chips).

TO DISPLAY YOUR WINNING

On the left side of the chip tray is a portion of a check. Move the pointer on top of the check and press A. You will see your earnings displayed for the chips you are using. Press A again to return to game mode.

If you prefer, you may also press START to display the check.

BLACKJACK

Blackjack is the casino's most popular card game. The game was adapted from a version of the French game vingt-et-un or "21".

The object of the game is to have the total point value of the cards that you possess the point value of the Dealer's hand without going over 21. If you go over 21 or "bust", you automatically lose, even if the Dealer subsequently also goes bust. Picture cards (Jack, Queen or King) count as 10. Aces count as either 1 or 11, whichever you choose. All other cards (2, 3, 4, 5, 6, 7, 8, 9, 10) count as face value.

After you place your bet, the Dealer starts the game by dealing you two cards and himself two cards. If you feel you need additional cards to beat the Dealer, you may take a "hit" and receive another card. There is no limit to how many "hits" you can take as long as you don't "bust" (go over 21). When you are satisfied with your hand, you will indicate to the Dealer that you will "stand" or not receive any more cards. The Dealer will then check his cards. The Dealer must draw a card on any point total of 16 or less and stand on any point total of 17 or more. If your cards total 21 or less and the Dealer's point total is over 21, you win. If the Dealer gets closer to 21 than you without going over, the Dealer wins.

When your point value is the same as the Dealer's, the hand will be a "push" (you neither win nor lose) and your bet will be returned to you.

HOW TO PLAY BLACKJACK

The two Blackjack tables are located in the lower left corner of the casino. Watch your chip float the pointer to the table of your choice and press the A button.

AT THE PLAYING SCREEN:

TO BET: Place the pointer on top of one of the chips you wish to bet. Use the pointer to show the chip you wish to bet to the DIT square and press A to release the chip. By pressing the A button will automatically move all more chips of the same color value as the chip you most recently placed in the DIT square. Moving down the A button will move the chips up more rapidly, or "up-bumped" your bet. For example, if you move a \$1 chip up to the DIT square and press A five times, you will increase your bet to five \$1 chips.

THE DEAL: When you are satisfied with the amount you have bet, move the pointer up to the large OP where the word "deal" is flashing and press A. The Dealer will now deal you two cards.

TO HIT: After you have received your first two cards, you may wish to take a "hit" or "stand". If you would like another card, press the A button to the right of your hand where the word "hit" is flashing. From this position, you may press A to receive as many additional cards as you wish. Remember, your goal is to get as close to 21 as possible without going over. If you do bust (go over 21), the Dealer will take your bet. Your cards will remain on the screen until you press A to deal the new bet.

TO STAND: Whenever you are satisfied with the point total of your hand, move the pointer to the DIT square where the word "stand" is flashing and press A.

BLACKJACK: If your first two cards total 21 (any Ace with a 10, Jack, Queen, or King), you have a Blackjack or a "natural". If both you and the Dealer have Blackjack, it's a standoff or "push". A Dealer's Blackjack (two card point total of 21) beats a Player's three card point total of 21. A wrong Blackjack is paid 2 to 1 or 1.5 times the amount of your bet.

SPLITTING PAIRS: If your first two cards have the same numerical value, you may split them into two hands. You may also split any two of the following two face hands: 10, J, Q, K. Only after the first hand is played and completed may you play on the second hand. If the split pair are Aces, you are limited to a one card to each hand. When you split a pair, a Blackjack pays off the amount of your original bet only and not 1.5 times your bet.

TO SPLIT A PAIR: If you would like to split a pair, move the pointer to where the word "SPLIT" is flashing on the right side of the screen and press the A button. The bet on the second hand will automatically be placed and is equal to the original bet.

DOUBLEING DOWN: When your first two cards total 10 or 11, the word "DOUBLE" will flash on the left side of the screen. When the flashing "DOUBLE" appears, you may elect to wager an additional amount equal to the value of your original bet.

When you double down, you are allowed to draw only one additional card.

TO DOUBLE DOWN: If you would like to double down, move the pointer to the "DOUBLE" square and press the A button.

INSURANCE: If the Dealer's face up card is an Ace, you may elect to take insurance after the initial deal. The insurance bet is a wager that the Dealer has a Blackjack. In other words, you are betting that the Dealer's face down card will be a 10, Jack, Queen, or King. It will cost you one half of your original bet to buy insurance. If the Dealer has a Blackjack, your original bet and your insurance bet will be returned to you. Insurance bets pay 2 to 1. If the Dealer has a Blackjack, that loss is all other instances. If the Dealer doesn't have a Blackjack, he will lose your insurance bet and you will play out your hand as usual, hitting or standing, as you wish.

TO BUY INSURANCE: Move the pointer to the **INSURANCE** box at the top of the screen and press the A button.

TO START A NEW DEAL: At the end of each hand, the cards will remain on the screen for you to examine. After you have studied the cards, press A anywhere on the card table. Now you are ready to begin betting on the new hand.

TO EXIT: You may exit to the main screen flow after your hand has been played by pressing **DOWN**.

MAXIMUM BET: The maximum bet for Blackjack is \$10,000 or \$20,000 if you opt your hand as Double Down on your bet.

THE BIG SIX MONEY WHEEL

Also known as the Wheel of Fortune or Fun-Money Wheel, this is an easy game to play that can leave you swimming in the chips.

Bets are made by placing a chip on the layout in one of the boxes. These boxes correspond to the numbers on the wheel and indicate the payout ratio. Bets must be made before the wheel is spun. Bets are paid off immediately after the Wheel stops on a number. If that number is the one you've placed your money on, you're a winner. The higher the odds, the larger the payout.

HOW TO PLAY THE BIG SIX MONEY WHEEL

The **MONEY WHEEL** is located in the middle of the layout down the area on the right.

AT THE PLAYING SCREEN

TO BET: Move the pointer to the numbers that form the shape you wish to bet. When the pointer is resting on a chip, press A. Move the pointer with the chip attached to it on top of the wheel. Whenever you release the wheel will stop on. Once you have positioned a chip in the box you wish to bet on, press A to release the chip. Re-pressing the A button will increase the amount of similar chips for that particular bet. Holding down the A button will move the chips up more rapidly, or "auto-repeat" your bet. You may place a bet in one or all of the boxes that appear on the table, as long as you have the money to do so.

PAYOUTS: Here is an example of how the payouts work. If you are betting a \$1 chip on the 500 box, and the wheel stops on 500, you will win 20 \$1 chips. If you bet more than \$1 on a dollar value and you win, you will get your bet multiplied by the dollar value you wagered on as well as your original bet returned. For example, if you bet \$5 on the 500 dollar box, and the 500 box showed up on the wheel, you would win \$40 (\$5 x 20) plus your original \$5 bet.

TO OPEN THE WHEEL: Move the pointer to the very top of the screen and press the A button on the bottom of the wheel to start it spinning.

MAXIMUM BET: The maximum bet on any dollar box including the "CASINO" and "CLASS" boxes is \$10,000.

ROULETTE

Roulette can be traced back to ancient Greece, when soldiers would spin their shields on the points of their spears and then bet on where they would stop. And in Roman times, Caesar played on a chariot wheel that he had modified in the gaming room at his palace. The game as we know it today is of French origin and dates from the early 18th century.

Roulette is an exciting game that is played throughout the world. The large payouts that are possible for small wagers always draw the interest of the player as well as the house players.

The diagram indicates the payouts for single chip bets and the many combinations available to you.

TYPES OF BETS AND PAYOUTS:

- | | |
|--|---|
| A. Single number bet pays 35 to 1. | F. Six number bet pays 5 to 1.
Example: 1, 2, 3, 10, 11, 12. |
| B. Alternated "neighbor" bet. | G. Column bet (12 numbers in a horizontal row) pays 2 to 1. |
| C. Double number bet including zero (17 to 1). | H. Twelve numbers or dozens (1st, 2nd, 3rd) bet pays 2 to 1. |
| D. Three number bet pays 11 to 1. | I. All bets placed on the squares on the bottom (1, 18, 29, 36) pay approximately 14 to 1 pay even money. |
| E. Five number bet pays 6 to 1. | |
| Also called a "corner bet". | |
| F. Five number bet pays 3 to 1. | |
| Also called "square bet" which includes the following numbers: 0, 00, 1, 2, 3. | |

HOW TO PLAY ROULETTE

The two Roulette tables can be found down the steps, in the lower right corner of the casino.

There are 38 positions on the wheel, containing the numbers 1-36 as well as a 0 and 00. Half of the numbers 1-36 are dark and half are light. Each spin of the wheel provides a multitude of options for the player. A player may bet on single numbers, sets of numbers or adjacent numbers. A player may also play odd or even numbers or light or dark numbers. A bet on a single number pays 35 to 1, including 0 and 00. Unlike the other numbers on the wheel, the 0 and 00 don't count as being light or dark, odd or even. Bets on the light and dark, odd or even pay back 1 to 1 or even money.

TO BET: Move the pointer to the chip of your choice and press the A button. Once the chip is attached to the end of the pointer, press your bet on the Roulette table and, when you have the chip positioned where you like, press the A button. Right after you have placed one chip on the Roulette table, you may repress the A button if you would like to increase the amount of money chips on that particular bet or bet down the A button for "auto-repeat". Study the diagram to see how to position your chips for each possible bet. You may place up to eight bets per each spin of the Roulette wheel. After you have placed eight bets, the wheel will start spinning automatically.

If you would like to place a bet on the right side of the table, move the pointer to the right side of the screen and continue holding down the right arrow until the position you would like to bet on is visible.

TO PLAY AGAIN: Press the A button to clear the table and then follow the above instructions for betting and spinning the Roulette wheel.

TO QUIT: Once the wheel has stopped spinning and the Dealer has collected the losing bets and paid out the winning ones, you may press Select to take you back to the main Casino floor.

MAXIMUM BET: For each spin of the wheel, you may place eight bets. You're allowed to bet a maximum of \$1,000 for each bet placed.

TO SPIN THE WHEEL: After you have placed all of your bets, move your pointer anywhere on the Roulette wheel visible on the left side of the table. Press the A button to start the wheel spinning.

Once the wheel has stopped spinning, the screen will scroll to the right and you will see the Dealer take away all the losing bets. The screen will then scroll back to the left, paying off the winning bets. If there are any.
