BANISHED TO THE FUTURE

Samurai Jack is a warrior from the past banished to the future by the evil wizard ōku.

From childhood, Jack's destiny was to free his people from ōku. He trained in the martial arts, becoming a master with the Samurai sword, Throwing Stars and Bow. But sly ōku recognized Jack as a threat. In a masterstroke of treachery, the wizard cast Samurai Jack into the future leaving his people defenseless.

Now Jack's family and friends are his ancient ancestors. He wanders the world in search of the portal that will return him home.

And ōku? His evil shadow darkens the future as well. ōku's robot minions are invading peaceful lands to imprison, enslave and brainwash innocent inhabitants. The only hope is Samurai Jack, and every soul he rescues brings him one step closer to his destiny – the destruction of ōku.

THE GAME SCREEN

- Press the directional button Down to show the full stats display during play.

HEALTH METER

This is Jack's life force. If it reaches zero, he is defeated and the world is doomed. Find Sushi to heal Jack and replenish the Health Meter. You can find Sushi of various serving sizes almost anywhere. When Jack's health is dangerously low he also loses his shirt and can no longer run. Collect enough Relics and you can increase the capacity of Jack's Health Meter by visiting a Health Shrine.

ARMOR METER

When Jack picks up armor, the Armor Meter appears. The Armor Meter length varies depending on the strength of the armor Jack is wearing. Each dot on the meter represents one hit. Each time Jack is attacked, the armor weakens and one dot disappears from the Armor Meter. Weak armor can only take three hits. Heavy armor can take up to 12 hits. As long as Jack is wearing armor his health will not suffer from attacks.

ZEN ENERGY METER

Zen is the magical energy force that an enemy releases when defeated in combat. Each time Jack wins a battle the fallen enemy gives up Zen energy that fills Jack's Zen Energy Meter. Jack uses this energy to enter Sakai Mode (hold the R2 button). See "Sakai Attack Mode" on page 14 for more information. After you collect enough Relics, visit a Zen Shrine to increase the capacity of Jack's Zen Meter.

THE GAME SCREEN

BLADE MAGIC

Jack begins with only a basic blade but can acquire magical enhancements that increase the damage of each attack. Press the directional button Left/Right to change the Blade Magic. See Blade Magic Enhancements on page 13 for more information.

NUMBER OF RESCUED LOCALS

Many who see the shadow of Ōku become his prisoners. Rescue 30 in each realm and your compassion will be rewarded with Blade Magic.

RELICS COLLECTED

Collect every Relic you can find. These ancient artifacts were left long ago by Jack's ancestors and are of great value. Use Relics to pay for the right to meditate at Shrines and increase Jack's powers. See "Shrines and Relics" on page 15 for more information. It is said that large and very valuable Shrines were hidden.

THROWING STARS & ARROWS

These show how many Throwing Stars or Arrows Jack holds and the maximum possible for each.

ENEMY TARGET MARKER

This Target Marker shows which enemy Jack has targeted and displays its state of health. The Target Marker must appear over an enemy for Jack to be able to attack it. When the enemy is healthy the target marker is Green. As Jack inflicts damage, the marker drains and changes color to yellow, then red when the enemy comes close to defeat. Even though an enemy displays a red marker, it may still be deadly so keep attacking until Jack is victorious.

MOVING AROUND

Search every corner of the world for valuable treasure and hints about what to do next.

JUMPING

Press the **○** button to jump up or over openings. Sometimes a double jump (**○** button twice) will be the only way to reach new heights or clear large gaps.

CLIMBING

Press the left analog stick Up/Down to climb ladders.

DODGE ROLL

Jack is able to dodge attacks and quickly maneuver behind enemies by using the Dodge Roll. To execute a Dodge Roll, hold down the R1 button, then press the **○** button and any direction on the left analog stick. Jack will quickly jump to the direction pressed on the left analog stick.

KEYS

A key sometimes is the only way to enter an area. But you must defeat a key keeper first and these tough enemies often have reinforcements. The Key Icon appears on-screen when you are carrying a key.

THE WORLD HUB

The World Hub connects all the realms where Samurai Jack travels. Aku designed this hub as a rapid transit system to move his robots quickly from one evil deed to the next. But Jack can also use the World Hub to travel quickly between any realms he has already unlocked. You must find the person who will show you how to use this area.

CHECKPOINTS

Find one of these and touch it. If you are defeated, the game will resume from the last checkpoint you touched.

GAINING VITAL INFORMATION

TALKING

Press the **×** button to talk with anyone who displays an "X" over his or her head. Many will have valuable information.

ANCIENT SCROLLS

Samurai Jack's relatives knew of his fate. They left scrolls containing lessons and insights in the hope that Jack would find them during his trek through the distant future. Walk up to the scroll and press the **×** button to read vital information.

SWORD FIGHTING

Jack is a master swordsman and he will grow stronger with each devastating attack he learns.

BASIC SWORD ATTACKS

The most basic sword attack is a quick side-to-side slash achieved by tapping the **X** button. Press the **Y** button for a more lethal attack that begins with an overhand chop. Additional presses on either the **X** or **Y** buttons reveal more complex combinations. To deliver an airborne downward thrust, tap the **Z** button twice for a double jump then press the **X** or **Y** button to thrust the blade straight down.

LEARNING ATTACKS FROM COMBO SCROLLS

Samurai Jack's super lethal attack combinations combine sword slashes with incredible martial arts moves. But to learn these devastating skills, he must pick up a Combo Scroll. When you discover one, it will reveal the exact button controls to unleash the attack. Once you have picked up a scroll, Jack will be able to execute the attack throughout the rest of his journey. Review all the combo attacks in the Game Controls section on page 4.

SWORD FIGHTING

BLADE MAGIC ENHANCEMENTS

Once Samurai Jack has been rewarded with Blade Magic he can switch from a standard blade to one of the more powerful blades by pressing the directional button Left/Right. There are a total of three types and they enhance the power of Throwing Stars and Arrows too. Each type increases the damage inflicted on specific enemies by 25% and each damage hit depletes Zen Energy. The trick is discovering which enemy is most vulnerable to your chosen magic.

STANDARD BLADE

FLAME

CRYSTAL

ELECTRIC

GUARDING TO BLOCK OR DEFLECT ATTACKS

Press and hold the **R1** button to block attacks with Jack's sword. Be careful though. Some attacks can overwhelm a guarding move. React quickly and you can also use your sword to deflect a projectile back at an attacker to inflict damage.

ATTACKING

ATTACKING WITH THROWING STARS

Throwing Stars are lethal at a distance. Use them when you cannot attack with a sword or want to keep your distance to avoid injury. If an enemy is displaying a Target Marker you can hit him with a Throwing Star. Press the **△** button to use the Throwing Stars. You will always attack the closest enemy. Some enemies can block your Throwing Star attacks, so don't waste ammunition. Bundles of Throwing Stars are contained in breakable items throughout the realms.

ATTACKING WITH THE BOW AND ARROW

Bow and arrow attacks can be performed at a greater distance than Throwing Stars and are more powerful. Arrows can be found in breakable items throughout the realms. To attack with the Bow: Press and hold the **L1** button to draw the Bow. Use the left analog stick to aim your shot. When the Target Marker appears over the enemy, press the **×** button to release the arrow.

SAKAI ATTACK MODE

Each fallen enemy provides Jack with Zen, which fuels his devastating Sakai Attack Mode. When the Zen Meter shows blue, press and hold the **R2** button to enter Sakai Attack Mode. Instantly, Jack's enemies slow to a small fraction of normal speed while he moves at 50% of normal speed to create a tremendous attack advantage. This is a lethal technique especially when fighting multiple enemies. Any attacks inflict increased damage. Sakai Attack Mode ends when the blue drains from the Zen Meter or you release the **R2** button.

SHRINES AND RELICS

Meditating at Shrines will increase Samurai Jack's powers in some specific way. But in order to gain these rewards, Jack must pay with the ancestral Relics collected during his journey. Each Shrine will display the number of required Relics. Once granted, Jack's newfound powers are permanent.

1. Walk Jack up to a Shrine and press the **×** button.
2. Read about the meditation and press the **×** button. The required number of Relics will be taken and Samurai Jack's power enhanced.

DAMAGE SHRINE

Make Jack's warrior attacks more powerful.

HEALTH SHRINE

Increase the capacity of Jack's Health Meter.

ZEN SHRINE

Increases the capacity of Jack's Zen Meter and slows its depletion during Sakai Attack Mode.

MISSION COMPLETED SCREEN

View your stats at the completion of a mission. Note the percentage of villagers you rescued and how many Relics you found.

THE PAUSE MENU

Continue the current game.

STATS

View the number of rescues made and Relics collected compared to the maximum possible. Press the left analog stick or directional button Up/Down to view the stats for each level in a realm and Left/Right to select a different Realm.

OPTIONS

Change Music and Sound settings or turn the DUALSHOCK®2 analog controller vibration function ON/OFF here. Press the left analog stick or directional button Up/Down to select a menu option and Left/Right to change the setting.

QUIT GAME

Return to the Main Menu.

GAMEPLAY TIPS

- Collect every Relic you can find. Look everywhere. These valuable items are a gift from your ancestors and provide you with access to Shrines for power-raising meditation.
- Choose your Shrine meditations wisely. Try to match your own fighting style with the kind of enhancements you choose.
- The Blade Magic you acquire by rescuing locals powers up your Throwing Stars and Arrows as well as your sword.
- The Bow and Arrow is more powerful than the Throwing Stars, but slower because you must take the time to aim.
- Sakai Attack Mode slows your enemy down. Save it for when you battle multiple opponents or you need to trick a very fast and powerful enemy.
- Combo attacks inflict heavy damage. Use them often.
- Rescue all of the kids in Ōku City and you'll receive a very special power-up.
- Perform a string of attacks without interruption and Auto-Sakai will be triggered. During Auto-Sakai, the action slows down as in normal Sakai but Jack does not lose any Zen Energy while the Sakai is active.
