The Draft Day Summary lists the players that you selected in the draft, as well as any players you acquired in draft day trades. From this screen you'll need to decide whether you want to sign any or all of the players drafted. Any player(s) you try to sign will take you through the contract negotiation process where you'll need to make a decision on whether he's worth the money to add to your team. See *Expired Contracts* on page 24 for more information on signing draft picks.

- After signing your players, press **○** to move to the CONTINUE option and press **⊗** to move on to start the following Season.

INJURIES

Player injuries can turn the course of the game. With Injuries ON, a team can lose its best player for not only the game, but for an extended period of time. Keep Injuries OFF to prevent player injuries from occurring.

GAME SPEED

Use Game Speed to set the pace of the game. The higher the setting, the faster the game moves.

CLOCK SPEED

Clock Speed allows you to set the pace of the game clock. The higher the setting, the faster the clock will move, shortening the time it takes to play the game.

MUSIC VOLUME

Adjust the volume of the in-game music. The higher the setting, the louder the sound.

The Multi-Player Cam is best suited when using a Multitap (for PlayStation 2), allowing you to see the whole field. The Classic Cam is the game's default view.

CPU RUNNING

CPU Running allows you to set the CPU's offensive running ability. The higher the setting, the better the CPU's ability to run the ball against you.

CPU RUN DEFENSE

CPU Run Defense allows you to set the CPU's ability to stop the run on defense. The higher the setting, the easier it will be for the CPU to stop your running attack.

CPU PASSING

CPU Passing allows you to set the CPU's offensive passing attack ability. The higher the setting, the better the CPU's ability to pass the ball against you.

CPU PASS DEFENSE

CPU Pass Defense allows you to set the CPU's ability to stop the passing game. The higher the setting, the easier it will be for the CPU to stop your passing attack.
