IN-GAME TECHNIQUES

Serve

Set a serve position with , , and press **X**, **●** or **■** button to toss the ball. When the player tosses the ball, a serve gauge will be displayed beside the player. Press **X**, **●** or **■** button with good timing because the serve becomes faster as the serve gauge gets closer to "MAX." Press **X** button to make a straight serve, and press **●/■** button to make a slice serve.

After pressing that button and before hitting the ball back to the opponent, press , , , or  to select the direction to hit the ball. Use  or  to aim left or right, and use  or  to aim to the front or back.

Shot Type

A topspin shot (**X**) button is a regular shot with a forward spin (vertical spin). The ball moves fast, but its trajectory is high and bounces high. A slice shot (**●**) button has backspin. The ball moves slowly as if floating in the air. Its trajectory is low and bounces low. A lob shot (**■/X+●**) buttons has a high trajectory and goes over the opponent's head. It is used to hit the ball behind the opponent when the opponent is at the net.

Shot Strength

You can hit the ball harder (faster) if you run to the ball fast enough to get ready for the shot. On the other hand, if you barely catch up to the ball and are not ready for the shot, you will not hit it hard. The strength of the shot changes with the height you hit the ball at [shot point]. It is difficult to hit the ball back hard if the ball has a low shot point, for example right after it bounced. The higher the shot point, the harder the shot becomes.

Drop Shot

Press  after pressing **●** button to aim at an area near the net. You can make a drop shot that falls near the net. It is effective when the opponent is at the baseline.

Smash

GAME MODES

There are 4 modes to choose from

This section explains the contents and operations of the "TOURNAMENT," "EXHIBITION," "WORLD TOUR," and "OPTIONS" modes.

TOURNAMENT [for 1 to 4 players]

Try to win all 5 stages of singles matches and 3 stages of doubles matches. Press the START button of another controller during the game to jump into the game [P.9].

1 Selecting a match system

Select "TOURNAMENT" in the Menu Screen to display the "SINGLES / DOUBLES" menu.

2 Selecting a player

Select a player from the 16 featured male and female players. Select with the directional button, and confirm with **X** button. To use a player created/trained in WORLD TOUR mode, select "World Tour" shown on the right. "World Tour" can only be selected when a player was created in WORLD TOUR mode and the memory card is inserted. Since the non-1P controller can also use a customized player if a memory card with WORLD TOUR data is inserted into the memory card slot of that controller, you can play your customized player with or against your friend's.

3 Starting the match

The match starts after selecting and confirming the player and the opponent. Try to win the series of matches. Press the START button during the game to display the Pause Menu [P.7]. To continue the game after losing, select "CONTINUE" and press **X** button. To return to the Menu Screen, select and confirm "END."

"Jumping Into the Game"

In both "TOURNAMENT" and "EXHIBITION" modes, other players can "jump into the game" by pressing the START button of an unused controller. The START button can be pressed during player selection or during the game. It works as follows:

Select Player

First, select a player. Although a male player cannot play against a female player, it is possible to make a mixed pair in doubles.

Coin Toss

Toss a coin to decide who serves. There are no controller operations here.

Start the Game

The game starts after deciding who serves. Up to becoming a 4P game, it is possible to "jump into the game" even after the match has started.

EXHIBITION [FOR 1 TO 4 PLAYERS]

A mode for challenge matches where game settings can be freely assigned. There is only one match in this mode. Here, too, it is possible to "jump into the match" by pressing the START button of another controller during the game (P.9).

1 Selecting a match system

Select "EXHIBITION" in the Menu Screen to display the "SINGLES / DOUBLES" menu just like in the TOURNAMENT mode.

2 Setting the player position

Set an initial player position regardless of singles or doubles. Use \blacktriangle \blacklozenge \blacktriangledown of the directional button to select a position, and confirm with **X** button. Press the START button of other controllers to play a game with 2 to 4 players. Each player selects and confirms their position here, too.

3 Setting rules

4 Selecting players

Just like in the TOURNAMENT mode, select one of 16 male and female players to control. After your selection, assign opposing COM players.

5 Selecting a stage

Select a stage to play the match. Only 5 stages are available at the beginning. As the game proceeds, you can purchase stages at a shop in "WORLD TOUR" mode and then select more stages for play here.

6 Starting the match

Start the match after selecting the stage. Press the START button during the game to display the Pause Menu (P.7).

About tiebreakers in "Tennis"

An extra game will be added if no player wins by 2 or more games within the set number of games. After the players have won the same number of games, the last game will be a tiebreaker. In the tiebreaker, points will be counted as numbers (e.g. 5-6), and the first player to win by 2 while gaining 7 or more points is the victor. Each player serves twice in a row. This rule is slightly different from the rules of actual tennis.

WORLD TOUR [FOR 1 PLAYER]

Create one male player and one female player, and join the World Tour. Train the created players through mini-games, and enter tournaments held all around the globe to compete for the #1 world ranking.

- 1 Starting the WORLD TOUR
When selecting the "WORLD TOUR" mode for the first time, the game starts from step 2 below. If there is "WORLD TOUR" saved data, a menu will be displayed. Select "NEW GAME" to start a new game and select "CONTINUE" to continue a saved game.

To see the schedule for other months and check competitions to enter, use \blacktriangle of the directional button. Select and confirm "RETURN TO MAP" to return to the World Map and "GAME END" to quit WORLD TOUR mode.

HOME

Check the status of players and change their clothes to new ones. Select "STATUS" or "GEAR" to proceed to each screen.

STATUS Check player abilities. Press R1 button to switch players. Press \blacktriangle button to return to HOME. Status can be enhanced through training [P.16]. Check the status often and create your ideal players.
