Sims are a lot like you: they have moods, urges, and soaring desires (of course, sometimes their desires have to do with ordering pizza). LIVE MODE INTERFACE

- ◆ To discover your Sims' needs or wants, access the Character Panels by pressing the D-button.

- ◆ The Character Panels are your window into your Sims' moods, motives, ambitions, and relationships. There are four panels in the interface: Career, Relationship, Motives, and Personality.

MOTIVES

Discover if your Sims' needs are being met.

CAREER

Indicates your Sim's employment status, salary amount, and skills.

RELATIONSHIP

Offers a list of your Sim's friends and how happy they are with your Sim.

PERSONALITY

Indicates your Sim's natural tendencies towards being neat, outgoing, or playful.

MOTIVES

What does your Sim want? Entertainment, the company of good friends, or perhaps just an extra large pizza? Find out exactly how to fulfill your Sim's needs in the Motives panel.

Hunger

Eat a meal or snack. This includes ordering pizza or eating food prepared by other Sims.

Hygiene

Take a bath or shower, or wash your hands in a sink.

Bladder

Use the toilet (no peeing in the bushes).

Energy

Sleep or drink coffee. Your Sims get a little more kick from drinking espresso.

Fun

Entertain your Sim with the TV, stereo, pinball machine, or a pool table. Reading a book also entertains Sims.

Social

Interact with other Sims.

Room

Instruct your Sims to enjoy the landscaping or decorations of their abode (such as by gazing at a pretty painting). Sims are affected by their surroundings. Broken items, dirty dishes, or trash strewn about can depress them.

Comfort

Sit, sleep, take a bath, or nap.

CAREER

Sims need enhanced skills in order to fulfill goals as lofty as career promotions or as simple as not setting the kitchen on fire while attempting to cook dinner. Learn more about your Sim's skills in the Career Panel.

- ▶ The Career Panel provides details on your Sim's current employment status, salary, and basic skills.

- ▶ Your Sim is rated in the following skills: cooking, mechanical, creative, body, logic, and charisma.
- ▶ There are a number of means to enhancing a Sim's skills. The chart below lists skills and improvement methods.

SKILL	METHOD OF ENHANCEMENT
Cooking	Read a cookbook from the bookcase.
Mechanical	Read a mechanical book from the bookcase or work at the workbench.
Creative	Paint, play the piano or guitar, or use the carving block.
Body	Swim or work out on an exercise machine.
Logic	Play chess.
Charisma	Practice your public speaking at a mirror.

- ▶ To get a job, pick up the newspaper (which is delivered each morning) and select LOOK FOR JOB. A list of job opportunity appears.
- ▶ Sims start at the bottom rung of all career tracks. As skills and friendships increase, promotions are more likely.
- ▶ The carpool arrives every morning to take your Sim to work. Be sure to get your Sim to the carpool in the time allotted. If your Sims fail to meet the carpool two days in a row, they lose their job.
- ▶ When a Sim is imported into a new game mode, the Sim will become unemployed and will need to find a new job.

RELATIONSHIP

- ▶ Your Sim's friends are listed in the Relationship menu. The bar beneath the face of your Sim's friend indicates how pleased that friend is with your Sim. A green bar indicates that the friend is very pleased. A red bar indicates the friend is unhappy with your Sim.
- ▶ Relationships are important to Sims. Sims can make friends and even get married. In order to form relationships with other Sims, though, your Sim must have things in common with these Sims and must be in a good mood.

PERSONALITY

What is your Sim's personality like? Is he or she messy or neat, playful or serious, outgoing or reclusive?

- Personality attributes include: Neat, Outgoing, Active, Playful, and Nice.
- The quantity of shaded bars in each attribute indicates how neat, active, or playful your Sim is.
- Personality is an influential component of needs fulfillment. A Sim with a high playful rating might have more fun playing a game on the computer than reading a book.

How do you change the most dismal digs into a charming chateau or a lively love palace? Build mode gives you the ability to add features such as fences, pools, and building additions.

- To access Build Mode, select BUILD in the Modes menu. The Build Mode screen appears.
- To scroll through available build tools, press the D-button ↓.
- To scroll through available options within a specific build tool type type, press the D-button ←→.
- To obtain further information on a build tool type, press the ■ button.
- To buy a structure, press the ✕ button.

- ✦ To return to the Modes menu, press the **▲** button.
- ✦ While landscaping items do not add value to your Sims' houses, they do increase your outside room score.

To build:

1. Press the **✳** button in the Build Mode screen to select a desired item to build. The item appears on your screen.
2. Press the left analog stick to place the item you are building where you wish it to appear on your property.
