SET-UP/USE OF MULTI-PLAYER

Setting up and using The Multi-Player.

Please note that a controller must be plugged into the first port of the Super NES and the Multi-Player adaptor must be connected to the second port of the Super NES. Use controller #1 to make the game selections.

You can use the Multi-Player in the exhibition match and the Round Robin tag match mode. The Multi-Player works when a 2 player tag team takes on another 2 player tag team. (Not vs. the computer). In the Exhibition match mode, choose 4 players tag. In this mode, you and a friend will be playing against two other friends in a tag match.

At the start of the game, the player inside the red corner is controlled by the #1 controller which is connected directly to the Super NES, and the player that is resting outside the red corner by the #2 controller, which is connected to the Multi-Player. The player on the blue corner is controlled by the #3 and #4 controller. Please note that controllers #3 and #4 are connected to the Multi-Player.

GAME RULES, CONT.

Game Over:

1. Pinned by opponent. (3 count)
2. Defeat by ring out. (10 count)
3. Defeat by being on top of the rope. (5 count)
4. Draw by double ring out. (10 count)

Continue:

At the end of the game, pressing the Select button will cause a password to appear. Record this password in order to continue.

GAME SCREEN

Time meter changes in six steps according to the remaining power of the wrestlers. Even if a player is out of power, if he doesn't use any moves, he will recover.

GAME STRATEGY

1. Timing of the move

When two players come very close they will raise their arms to grapple. The best time to place a move is the moment when the wrestlers are about to touch each other.

2. Small moves most effective in the beginning

It is difficult to successfully administer a big move in the beginning of the game because the opponent still has a lot of power.

3. Attack from the back

When the opponent is down on the ground, use the Y button to get him in a half-up position, and move toward his back quickly (for slipper hold, kicking, etc...)

GAME PLAY MODES

Championship Tournament:

In this mode, after deciding which player you want to be, you must defeat every player in order to win the tournament. You may choose the length of the match to be 10 or 20 minutes, and you can select the difficulty setting. Either easy, normal or hard.

Championship Tag Match:

Championship tag match is basically the same as the Championship Tournament, however, you have another player waiting at the side of the ring to relay you when you get tired. In order to tag the resting player, move in the player's direction and press L at the same time. This will put the resting player into play. In the 2 player tag mode, you and another person are one team. The resting player is put into action by tagging him.

Round Robin:

In the Round Robin mode you can choose to play from zero to six players against zero to six computer players. First select, in the mode option, how many human players against how many computer players you would like to challenge. Then select your players; a grid will appear.

Move the square to choose your match. The winner will be represented with an O and the loser with an X. The player with the most O's is the winner of the tournament.
